

Continuing Education Information

California Water Environment Association (CWEA) no longer pre-approves classes for contact hours. It is up to the certification holder to attend course/trainings that are related to your vocation. You will submit your certificates of completion from the WWETT Show to CWEA when your recertification is due. At that time CWEA will review/approve them.

Vocation Approval Status:

Collection System Maintenance	Environmental Compliance Inspector
Laboratory Analyst	Industrial WWTP Operator
Plant Maintenance	Electrical/Instrumentation
Mechanical Technology	Biosolids Land Application

Contact Hour Process:

- **Attendee must be registered for each session they want credit for and scanned at the door to receive certificates of completion.**
- CWEA certificate holders will report their own contact hours at the time of recertification.
- WWETT will send an email notification approximately six weeks post show with instructions to download certificates of completion. Attendee will download or print earned certificates to submit to CWEA.
