100% AMERICAN MADE 100% TRENCHLESS 100% SUPPORTED

PERMA-LINER™ is the leading manufacturer and supplier of trenchless pipeline rehabilitation equipment & materials in North America. Since 1999 PERMA-LINER™ has developed systems to rehabilitate existing sewer systems without excavation.

Our experience in the CIPP (Cured-In-Place-Pipe) industry has allowed PERMA-LINER™ to design, patent, and manufacture state of the art technology. Based on the design of the equipment and materials, PERMA-LINER™ has the ability to offer compact, user-friendly systems. PERMA-LINER™ provides complete "Turn-Key" Trailer or Truck Build-Out Packages, Certification/Training, Technical Support, Marketing Support and Specification & Design Support.

WELCOME LETTER

On behalf of the WWETT Show management team, I want to welcome you to Indianapolis for WWETT Show 2018, and thank you for being a part of the premier event in the environmental services industry!

With 600 exhibiting companies, 100 conference sessions, and a selection of great networking events, the WWETT Show provides value to professionals from every facet of our field. We hope that you will take advantage of it all. In fact, we recommend you set these three goals for yourself:

- Find a service, tool, or product that will help make your business more profitable.
- Learn new information that will help you do your job more efficiently.
- Make at least one new connection that can make a difference in your business.

Special thanks goes to our partners at COLE Publishing. They built a great tradeshow – from the Liquid Waste Hauler’s Equipment & Trade Show in 1981, to the Pumper & Cleaner Expo, to the WWETT Show today. We are pleased that COLE Publishing continues to be our Presenting Partner in bringing the WWETT Show to you.

Our biggest thanks goes to each of you for making this event possible. WWETT Show 2018 exists because of your commitment to our industry. We salute you. Have a great time in Indianapolis!

Sincerely,

Douglas Lugo
Director
Water & Wastewater Equipment, Treatment & Transport

Simply great machines

From JHL to Bucher

For several years, our products have played a central role in securing a sustainable environment and a profitable business for our American customers.

For more than 100 years, we have been known as JHL, the manufacturer of world-class sewer cleaning units. In 2016, we became a part of Bucher, a global technology group with a leading market position within cleaning and clearing operations. Now, we are proud to announce we are fully merging by changing our name to Bucher Municipal.

For our customers, this means only benefits. We will keep the same high-quality products and add a significantly increased service network as well as the innovation and development input that comes from a corporation with over 200 years of experience in industrial manufacturing.

At this year's WWETT, we will be showcasing the new RECYcler® 208. Stop by booth #6343 to experience the power of a compact unit with the capabilities of a large recycling unit and the manoeuvrability of a smaller truck.

Bucher Municipal North America • 875 N. Michigan Ave., Suite 3950, 60611 Chicago IL, USA • Phone +1 (312) 7053813 • www.buchermunicipal.us

WWETT SHOW 2018 by Jim Kneiszel, Editor, Pumper Magazine

Welcome to the WWETT Show. You're Among Friends.

What would you give for a glimpse into the future of the water and wastewater industries, to learn the technologies of tomorrow today? And what's it worth to learn business strategies that will allow your skilled crews to work smarter and generate more income for years to come?

Imagine dropping into a dimension of time and space where all the most knowledgeable industry experts are at your service and the most advanced tools of your trade are easily at hand. In this place you could freely network with the best contractors on the planet and seek the answers to questions that unlock your company's true potential.

Well, imagine no more. You haven't exactly time-traveled to Indianapolis. But you have arrived at the WWETT Show. And it's your time to dig in and learn.

As a forward-thinking business owner, manager or technician, you're always looking for an edge over the competition. A leg up. A way to stand out from the crowd of service providers. The WWETT Show gives you that advantage in the marketplace ... in many ways. Let's count a few of them:

- **HANDS-ON PRODUCT RESEARCH.** Online shopping is great. But while a spin around the internet introduces you to a variety of products, nothing replaces getting a close-up look at all of the products your industry has to offer. This year 600 exhibitors will fill the Indiana Convention Center with thousands of the latest and greatest work tools, from the smallest plumbing fitting to the biggest vacuum trucks. And each exhibit is staffed by company representatives who know everything about how the products perform and whether they are right for your application. Check each product for build quality and craftsmanship. Compare similar products head to head in one building. Witness live demonstrations of many technologies.
- **TECHNICAL EDUCATION.** A huge benefit to WWETT Show visitors is the wide array of certified technical training seminars offered throughout the run of the show. Contractors can earn valuable required state and provincial CEUs right here in state-of-the-art conference facilities. You can conveniently collect these credits during the show rather than taking time out of your busy schedule when you get back home. This year includes 22 topic tracks covered through 60- and 90-minute sessions, plus four-hour comprehensive courses.
- **BUSINESS-BUILDING TIPS.** You can do a great job in the field, but you also need to know how to run a business effectively and reach your customers with a successful marketing message. To help you accomplish that goal, the WWETT Show features seminars covering important safety topics, information technology, small business promotion, winning sales formulas, and hiring and retaining great employees.
- **SHARED EXPERTISE.** The WWETT Show is a networking dream come true. Even if you run a one-person operation, you can meet and talk business with the leaders of top North American companies in your field. Or maybe you want to review best practices with another contracting company of the same size halfway across the country. Or maybe you'll start an informal roundtable discussion with several company owners over a delicious lunch. All of these scenarios happen every hour at the WWETT Show, a place where people relax and open up to share their experiences with a family of similar contractors.

YOU'RE AMONG FRIENDS!

Knowing the intrinsic value of the WWETT Show, arriving here in Indianapolis and picking up this program are great first steps to building a successful future for your business. Now go out and enjoy the show, learn new things and meet wonderful people who share your passion for the industry.

Original founders of the WWETT Show, COLE Publishing continues today as a partner in the presentation of the event. COLE Publishing is North America's largest publisher of print and web properties serving the water and wastewater industries.

WWETT SHOW 2018 INDUSTRY APPRECIATION PARTY

PLENTY OF FOOD & BEVERAGES • GREAT DOOR PRIZES • IMAX THEATER

Friday, February 23, 2018 | 5:30 pm - 8:30 pm | Indiana State Museum

The **Industry Appreciation Party** is moving to the beautiful Indiana State Museum, located just steps away from the Indiana Convention Center. Headlining the party is Scott Sharrard and the Brickyard Band.

(Beer and Wine is courtesy of the WWETT show!)

DON'T MISS SCOTT SHARRARD & THE BRICKYARD BAND

ABOUT Scott Sharrard

GRAMMY nominated musician Scott Sharrard had been the touring guitarist for the Gregg Allman Band since the Fall of 2008. He's been called "one of the best guitarists in the country" by Billboard.

While most recently acting as Musical Director & co-writer with Allman and recording his last record "Southern Blood" in Muscle Shoals, Scott has also been concentrating on the growth of his solo career while holding Gregg's legacy near and dear as a guiding light and point of everlasting inspiration. His next album "Saving Grace" has been recorded and will be released in 2018.

INDIANA STATE MUSEUM

SPARTAN TOOL
KICKOFF
PARTY

THURSDAY
FEB. 22 | 5 P.M.

LUCAS OIL STADIUM

SPARTAN
SINCE 1943

On Thursday, after a day of Expo Hall and education, kick off your evening off at the Spartan Tool Kick Off party at Lucas Oil Stadium. Get together with friends for food, drink, and music from the Jai Baker 3 Band as we celebrate WWETT Show 2018, courtesy of hosts Spartan Tool.

When: Thursday, February 22 @ 5:00 p.m.

Where: On the field at Lucas Oil Stadium

NETWORKING EVENTS

New Professional Networking Event

Wednesday | February 21 | 11:30 am - 1:00 pm | Room 116

Make important connections with other new professionals and with industry leaders. Bring your lunch, drinks and dessert are provided. This is part of the conference program; pre-registration is required.

Women in the Industry Social Hour

Wednesday | February 21 | 4:30 pm - 5:30 pm | Wabash 1 Lobby

Food, drink, and new friends and business connections! This is part of the conference program; pre-registration is required.

Nu Flow Technologies Beverage Break | Booth 4230

Thursday and Friday | February 22 - 23 | 2:00 pm - 4:00pm | Happy Hour
Saturday | February 24 | 10:00 am - 12:00 pm | Coffee Break

All attendees are invited to stop by for a beverage, courtesy of NuFlow Technologies.

Spartan Tool Kick Off Party

Thursday, February 22 | 5:00 pm - 8:00 pm | Lucas Oil Stadium

Food, drink, the FunZone, and music from the Jai Baker 3. Courtesy of Spartan Tool. Admission is free to all registered badge holders.

WWETT Show Industry Appreciation Party

Friday, February 23 | 5:30 pm - 8:30 pm | Indiana State Museum

Come join the celebration. Lots of food, beverages, and fun in the beautiful museum setting. Headliner is Grammy-nominee Scott Sharrard and the Brickyard Band. Come on and dance until the balloons drop! Admission is free to all registered badge holders.

GENERAL INFORMATION

GENERAL INFORMATION

Please note: The use of Segways is prohibited in Indiana Convention Center and Lucas Oil Stadium. The use of drones is prohibited in Indiana Convention Center and Lucas Oil Stadium.

ATM

ATMs are located on the first level of the Indiana Convention Center, in the Maryland Food Court, between Room 116 and the 500 Ballroom Reception Room, and behind room 140. ATMs are available throughout the public areas of Lucas Oil Stadium.

BADGES

Stop by Registration to print your badge. Bring your email registration confirmation or your Registration ID to look up and print out your name badge and conference schedule onsite. Hold on to your badge! Lost or misplaced badges will incur a \$25 fee.

BUSINESS CENTER

The Indiana Convention Center & Lucas Oil Stadium Business Center, in partnership with RICOH Business Solutions, is located on the first floor of the Indiana Convention Center in the Speedway Corridor, directly across from Meeting Room 116.

COAT CHECK

Coat and bag check is located in Room 140, near registration.

FIRST AID

The First Aid facility is located on Crossroads, near the Visit Indy kiosk.

LOCAL INFORMATION

Stop by the Visit Indy! counter, which is located on Crossroads, near the entrance to the Westin Hotel skywalk. And here's a tip - they will be providing free coffee on show days. But get there early - it goes quickly! You can also get local information and coupons at the special WWETT Show 2018 visitors site <visitindy.com/wwett18>

LOST AND FOUND

Lost and Found will be located in the Show Office, Room 109. At the end of the show, any items remaining in Lost and Found will be given to Indiana Convention Center security.

PARKING AND TAXIS

Approximately 12,000 parking spaces in surface lots and parking garages immediately surround our facility. An additional 40,000 parking spaces are within a ten-block area. Taxis typically pick up and drop off under the Maryland Street canopy.

EDUCATION

ASSOCIATIONS

The WWETT Show thanks the following associations for their contributions to presenting this event.

Indiana Onsite Wastewater Professional Association

Iowa Onsite Wastewater Association

National Association of Sewer Service Companies

National Association of Wastewater Technicians

National Environmental Health Association

National Onsite Wastewater Recycling Association

Portable Sanitation Association International

Southern Section Collection Systems Committee

Sump and Sewage Pump Manufacturer's Association

Wastewater Education 501(c)3

Water Jet Technology Association Industrial & Municipal Cleaning Association

WWETT SHOW CONFERENCE PROGRAM

The WWETT Show conference program offers an unparalleled collection of sessions that cover a wide variety of wastewater and business topics. These courses, organized by tracks, are led by top industry experts and professionals from leading associations, businesses, and manufacturers. This is your opportunity to learn, to polish your skills, and to find great tips to help grow your business.

CONFERENCE ADVISORY BOARD

A special thank you goes to the members of the WWETT Show 2018 Conference Advisory Board. This group provided great counsel and guidance in the development of this year's program. We thank you for your contributions.

Members of the group include:

- **Clay Barks**, President, Clay's Septic & Jetting, Inc.
- **David Hamberlin**, Wastewater Operations Manager, TREKK Design Group
- **Jerard Nighorn**, Vice President, Lenzyme, Inc.
- **Johnny Ziem**, Wastewater Manager, Town of Jackson, Wyoming
- **Matthew W. Sutton**, Partner and Vice President, RapidView, LLC
- **Michael Michell**, Foreman, Lorain County Engineering Department
- **Roger Winter**, Owner, W. Winter Sanitation, Inc.
- **Roxanne L. Groover**, Executive Director, Florida Onsite Wastewater Association
- **Suzan Marie Chin**, Chief Marketing Officer, Creative Raven

We are very pleased to announce the members of the WWETT Show 2019 Conference Advisory Board. This group has already started their work on developing next year's program. Members are:

- **Carol Mercer**, Co-Owner/Director, Sure Flow Plumbing
- **Cody Warner**, Business Development, Deep Trekker
- **Dave Jones**, Superintendent of Utilities, City of New Haven, IN
- **David Hamberlin**, WW Operations Manager, TREKK Design Group
- **Jake Saltzman**, Worldwide Technical Director, Picote Solutions
- **John Thomas**, Executive Director, Washington Onsite Sewage Association
- **Roxanne L. Groover**, Executive Director, Florida Onsite Wastewater Association

Thank you for your participation and the contributions you are making to advance education within our industry.

2019 CALL FOR PRESENTATIONS

The Call for Presentations for participation in the WWETT Show 2019 education program is open. We will be accepting proposals through April 26, 2018.

Consider the following:

- Can you give a great presentation at the WWETT Show?
- Do you have an experience or information you would like to share with your peers?
- Is there a new process or technology you would like to share with the industry?
- Do you ever wonder why a certain topic isn't on the agenda? Could that be your topic?

If you answered yes to any of these questions, please go to the Education tab on www.wwettshow.com and select 2019 CFP to complete the application.

INTRODUCING GORMAN-RUPP VALUPRIME™ PUMPS

Gorman-Rupp's new line of general purpose, priming-assisted pumps is designed to dewater your job site without taking a bite out of your bottom line. Available in 4" and 6" sizes, ValuPrime™ pumps feature 3" solids-handling capability, oil-lubricated mechanical seals and Final Tier IV engine technology.

And, like all Gorman-Rupp pumps, the quality engineering, manufacturing and testing that go into every ValuPrime pump will keep your site dry and your project on track.

➤ Visit ValuPrime.GRpumps.com for more information.

SAFETY	FR03: Hazardous Atmospheres and Gas Detection for Sewer System Confined Space Entry (Room: 136)	FR10: To Work Safely is to Understand Safety (Room: 233)	
SEPTIC SYSTEM INSTALLATION, REPAIR AND DESIGN Hosted by Wastewater Education 501(c)3	8:30 AM - 12:30 PM FR07: 4-HOUR Comprehensive Course - Soils for Septics (Room: 143) Close up HD video will be used to enhance the experience. Topics include soil color, texture, treatment, PERC tests, soils maps, mapping tools and more.		
SEWER AND DRAIN CLEANING, INSPECTION AND MAINTENANCE	FR04: JET UP!™ Taking Science to the Sewer! (Room: 233)		FR16: Tackling Water Utility Challenges Using Completely Portable Inspection Systems (Room: 233)
SEWER AND PIPE REHABILITATION, RELINING AND REPAIR	FR05: Manhole Rehabilitation Pilot Study Results: Comparing Geopolymer Lining System to Traditional Cementitious Liners (Room: 237)	FR11: Case Study: Franklin Township Sewerage Authority's Point Repair Rehabilitation Program (Room: 237)	FR17: Rockland County Interceptor Sewer Rehabilitation Program (Room: 237)
VACUUM TRUCK OPERATIONS	FR06: Vacuum Truck Applications (Room: 133)	FR12: Vacuum Truck Hydraulic System: PTO, Transference, or Belt Driven (Room: 133)	
WASTEWATER TREATMENT			FR18: Liquid Waste Processing (Room: 133)
WHAT'S TRENDING / NEW TECHNOLOGIES		FR13: Historical Evolution of Onsite Biofiltration Leading to Modern Innovative Solutions (Room: 235)	FR19: Modern Remote Monitoring (Room: 136)
TECHNICAL TOURS (Additional fee associated with tours)			
TECHNICAL TOURS HOSTED BY CITIZENS ENERGY GROUP	12:15 PM-2:00 PM (Actual tour time 1 hour) Belmont Advanced Wastewater Treatment Plant 2:00 PM-4:00 PM (Actual tour time 1 hour) DigIndy Tunnel Tour		
ADDITIONAL ASSOCIATION CERTIFICATION (Additional fee associated with this training)			
PSAI - PORTABLE SANITATION ASSOCIATION INTERNATIONAL	7:30 AM-11:30 AM PSAI Service Training for Portable Sanitation Professionals and Certification Exam (Room: 231)		

CERTIFICATION CLASSES

The WWETT Show offers two onsite certification courses. Attend one or both of these training sessions and go home with new certifications. Please note, there are additional fees for participating in these classes.

NOWRA One-Day Installer Class

Thursday, February 22 | 7:30 am – 4:30 pm | Room 231

This Installer Training Program is designed to convey nationally focused best practice standards for onsite wastewater treatment system installation processes as identified by industry stakeholders through an intensive national review process. This program serves as a mechanism to move the industry one step closer to the goal of uniform installation practices while raising the level of expertise and industry professionalism.

PSAI Service Training for Portable Sanitation Professionals and Certification Exam

Friday, February 23 | 7:30 am – 11:30 am | Room 231

This class provides a broad overview of the standards for excellence in the field. The course covers: unit construction; servicing of all types of units including trailers; safe loading and driving techniques; vehicle inspections; accidents and documentation requirements; proper placement of units; waste disposal; inspection/repair of units; health concerns and infection control. The course will conclude with the exam for those seeking a credential in the portable sanitation.

TECHNICAL TOURS

The WWETT Show is pleased to be working with Citizen's Energy Group to offer Technical Tours for our attendees. Please note, there are additional fees for participating in these tours.

Belmont Advanced Wastewater Treatment Plant

Friday, February 23 | 12:15 pm – 2:00 pm | Shuttle Bus pickup at Maryland Street Exit

You will tour the Secondary Treatment System and Control Room at the Belmont Advanced Wastewater Treatment Plant. The Plant has a capacity of 300 million gallons per day (MGD) and accepts flows from a combined sewer system. The secondary treatment system includes an air nitrification system and handles wet weather flows of 300 MGD.

DigIndy Tunnel Tour

Friday, February 23 | 2:00 pm – 4:00 pm | Shuttle Bus pickup at Maryland Street Exit

Citizen's Energy Group is constructing one of the largest infrastructure projects in the State of Indiana. The tunnel is approximately 250 feet below the surface of Indianapolis, with a bore diameter of 20 feet, a finished diameter of 18 feet, and will be 28 miles long when completed in 2025. The tour will offer a view of the second phase of the project that has recently started. You'll view the progress 250 feet below the surface in a man cage, and then brought back to the surface.

CONFERENCE SESSIONS

Wednesday, February 22

8:00 am - 9:00 am

Active Flow Rehabilitation of a 96" to 108" Sanitary Sewer Interceptor

WE01 | Room: 133 | Speakers: John Williamson, Fred Tingberg, Jr.

This case study is a project consisting of the rehabilitation of over 40,000 feet of 96" to 108" sanitary sewer in live continuous flows. Many rehabilitation techniques were utilized, including manhole rehabilitation, access shaft installation, cured-in-place pipe (CIPP), chemical grout, cementitious grout and cementitious lining. The work required the implementation of a safety/accident prevention plan specific to the dangers anticipated in deep sewer work as well as the influence of gasses and leaching from two landfills.

ATU: Care and Performance

WE02 | Room: 130 | Speaker: Dave Gustafson

This session will cover Advanced Treatment Units; how to care for these types of units; what type of Operations and Maintenance is needed; understanding how an ATU performs; interpreting the reading and results of an ATU. At the conclusion of the session the applicant will understand the importance of the functionality of ATUs and why Operations and Maintenance is critical to its performance.

Water Reuse and Pathogen Tracking

WE03 | Room: 231 | Speaker: Jay Garland

Water reuse is the topic of more and more dinner table conversations. So how can we be sure that we are protecting public health with the new water reuse systems? We need to look at new ways of defining and implementing water quality monitoring systems. This presentation will focus on the science of pathogen tracking and treatment, identify roadblocks, challenges and potential solutions.

From A to Effluent - The Essentials of Septic Tank Design

WE04 | Room: 136 | Speaker: Sara Heger, PhD

We will examine the evolution of tank design; discuss essential key aspects for effective septic tanks; explore the importance of water tightness and ways to maintain it; and identify factors that maximize retention time to lower demand on downstream processes. We will discuss newer technologies that can be incorporated into the septic tank to increase its effectiveness and expand its capacities, and we'll review national and international standards that apply to septic tanks.

Expand Your Inspection Toolbox with High Tech and Emerging Technologies

WE05 | Room: 240 | Speaker: Mark Hill

Every agency has pipelines that are challenging to inspect, ones that are critical, non-redundant, with a high consequence of failure. These are the pipelines that keep collection system operators up at night. This class will showcase equipment and technology for specialty inspection projects. This will provide detailed information and considerations for inspecting critical pipelines and discuss when the high-tech approach is warranted. It will review technologies available, capabilities and limitations.

Understand Digital and Analog Meters to Troubleshoot Your System

WE06 | Room: 243 | Speaker: Bo Gell

This session is designed to assist the contractor in understanding the capabilities of digital multimeters vs. analog meters as well as typical usage for troubleshooting pumps, panels, switches and VFDs. Specific issues addressed will include types of meters and their capabilities such as checking voltage, amperage, resistance, insulation resistance, continuity and capacitor measurements.

Vacuum Excavation Mini Bootcamp: Tips for Enhanced Safety, Productivity and Profitability

WE07 | Room: 237 | Speaker: Ben Schmitt, Mike Morehouse

This "mini boot camp" covers vacuum excavation essentials for enhanced safety, productivity and keeping the job profitable. Gain the perspective of the equipment manufacturer and operator with regard to hydro and air excavation considerations, including scoping the work before starting a job, job site setup, safety practices, maximizing productivity, and hiring and training employees/operators.

Birthing The Baby! How to Start or Retool a Wastewater Service Business

WE08 | Room: 235 | Speaker: Dendra Best

So you want to be a septic/port-a-potty service superstar? Why? Do you have a business plan? Have you assessed the market? Do you know how to choose a name, create branding, do effective/low cost marketing? How do you get a license? Attend this session to find out the answers to these questions and more.

How To Be a GREAT Boss

WE09 | Room: 143 | Speaker: Ellen Rohr

Are your team members driving you crazy? Are you buried under projects and it seems like they have plenty of time to whine? Are they just not... motivated? Perhaps the problem isn't them, but you. Attend this lively program to discover what it takes to be a great boss. Your team members will fix everything for you, if you help them win. Discover what it takes to create a culture of success.

WWETT 101: How to Get The Most From Attending the Show

WE10 | Room: 233 | Speakers: Jefferson Davis, Suzan Marie Chin, Mary Shafer

Are you a first-time WWETT Show attendee, or have you attended in the past but could use a refresher? If so, then this session is for you! This session will help you optimize your experience at the WWETT Show. You'll get tips on making a "game plan" for your duration at the show, navigating the Marketplace Expo Hall, and the importance of networking and successfully participating in networking events. Then, the session will conclude with a Q&A for your individual needs.

CONFERENCE SESSIONS (cont.)

Wednesday, February 22 (cont.)

10:00 am - 11:30 am

Critical Details for Municipal Grouting for the Experienced Contractors, Specifying Engineers and Public Works Officials

WE11 | Room: 133 | Speakers: Donald Rigby, James Shelton, Marc Anttil, John Nelson

The single biggest factor to a successful municipal grouting project is not the grout, it's the quality of installation. The contractor is primarily responsible for following the specifications for grout mixing, including grout concentration, additives, and proper gel-times. Thus, the relevance of experienced grout technicians and on-site inspection for guidance and oversight is apparent. Attendees of this session will know the 7 key success factors that determine the volume of infiltration removal and long-term effectiveness of a municipal grouting project.

Understanding EPA 503 Requirements for Land Application

WE12 | Room: 130 | Speaker: Dave Gustafson

We will review the EPA 503 requirements for land application; delve into the history of the regulation and its importance to the environment; how to interpret the regulation; and how to meet the regulation specific for Land Application. At the conclusion of the session the applicant will have a better understanding of EPA 503 Requirements and how they may be able to qualify for and use land application for their disposal needs.

Hands on Training with 5 Control Panels (Repeat of WE23)

WE13 | Room: 136 | Speaker: Dwayne Jones

This hands-on presentation will teach the importance of designing a control panel for an onsite project that achieves the desired functions, meets the sites electrical restrictions, and is serviceable after the installation. Four control panels will be set up as stations for hands-on training. Different technologies capable of various flow and electrical requirements will be featured. During the hands-on portion of the class, attendees will be split into small groups and spend time with engineers from each technology featured. Participants will be able to ask questions and physically program the panels.

Preparing for Hazards in Portable Sanitation

WE14 | Room: 233 | Speaker: Karleen Kos

The PSAI has captured the most effective ways to prepare for the extreme conditions your portable sanitation company will face. This session will cover how to handle intense heat, cold, and wind effectively. You'll learn how to react and protect your company if disaster strikes, ensuring you can respond to the business opportunities that may arise. Whether you are experienced at preparing for extremes or relatively new to this aspect of the business, you should attend this session.

Jetter Hose Inspection with Proper Repair - From Trailer Jettors to Combo Trucks (includes hands-on swaging demo)

WE15 | Room: 240 | Speaker: Rick Lewis

Attend this session to gain valuable working knowledge and understanding of the make up of a high pressure sewer hose, how to ensure proper use, inspection, repair and longevity. The class will cover proper safeguarding of all diameters and pressures of hose while in use. We'll also look at possible failures and learn the steps needed to avoid them. We will offer a hands-on swaging element to this session where you will be able to use a swaging machine to do a proper hose repair.

Basic Electrical Theory and Troubleshooting as It Relates to Floats and Onsite Septic Controls

WE16 | Room: 243 | Speaker: Mark McCollum

This presentation will provide attendees a better working knowledge of the electronics of a control panel, and how to safely and correctly identify a problem in the field. Basic electrical theory for residential/light commercial control panels will be discussed. Control panel components and how they relate and work together to make the control panel operate properly will be reviewed - including digital multi-meter use, proper ways to troubleshoot a float, and time saving troubleshooting techniques.

Waterblasting Safety Practices

WE17 | Room: 237 | Speaker: John McGraw

This session will focus on key safety practices for waterblast operations. The proper PPE, the proper use of anti-withdrawal devices and pressure deactivation devices, identifying projects where automated equipment can be used, and keeping workers clear of the "line of fire" will be discussed. Content for this session is drawn from a new entry-level waterblast operator training and certification program being developed by the WJTA-IMCA and the Houston Area Safety Council (HASC).

Getting It Right the First Time - The Legalities of Starting a Business

WE18 | Room: 235 | Speaker: Roy Jay Montney

So you've tested the waters, chosen a name, and ready to start business, right? In this session we'll be providing a checkbox list for what you should have in place to be a legal and business-grounded employer. Topics to be discussed:

- Setting up your EIN and other tax accounts
- Choosing the best legal basis/corporate structure - DBA, LLC, Ltd. or full INC.
- Risk management - what do you want /need to cover and plan for
- Reporting documents for yourself, your employees, your family partners
- Billing issues - your rights under the law

You're Hiring All Wrong

WE19 | Room: 143 | Speaker: Mike Agugliaro

How can you attract and build a team of A-Players (even when you don't think you're big enough)? If you think you're too small, or can't pay enough, or don't have a wide enough pool of people to draw from, attend this session to get information on ways to build a team successfully. The presenter will reveal how he built a large team of A-players using unique recruiting and training strategies.

Propelling Yourself and Your Business to the Next Level - Panel Session

WE20 | Room: 231 | Speakers: Ellen Rohr, Suzan Marie Chin, Mary Shafer, Frank Taciak

During this panel discussion, industry experts will be giving advice on best practices to help you and your career. You'll get tips on

- Leadership
- Company branding and image
- Personal branding and use of social media to extend your personal network
- Finding mentors and strategic alliance partners
- Having an effective plan to turn your business into a success

The final 15 minutes will be an open Q&A forum.

11:30 am - 1:00 pm

New Professional Networking Event

NPEVENT | Room: 116

We saved a seat for you! Bring your lunch and come network with other New Professionals, our Advisory Board, and some select speakers during the lunch hour. Making connections makes your business stronger! Drinks and desserts will be provided. Registration is required.

1:00 pm - 2:30 pm

Manhole Assessment and Rehabilitation: An Owner's Perspective

WE21 | Room: 133 | Speakers: Ed Paradis, Jason Brown

Procedures implemented by a utility owner for planning, start up and management of a manhole rehabilitation project will be discussed during this presentation. Discussion will include pre-inspection using NASSCO MACP (Manhole Assessment Certification Program) guidelines for condition assessment, manhole rehabilitation inspector training, product selection from infiltration/inflow (I&I) correction to linings/coatings, post-inspection and project success. A detailed discussion of using chemical grouts for manhole infiltration control and soil stabilization is included.

Land Application Loading Rate

WE22 | Room: 130 | Speaker: Dave Gustafson

This session will review understanding loading rates to the soils; how the different types of soils accept and treat the effluent; variables for calculating loading rates; making the calculations and interpreting the results. At the conclusion of the session the applicant will realize the importance of the soil treatment area component and how to accurately calculate loading rates based upon soil type and structure.

Hands on Training with 5 Control Panels (Repeat of WE13)

WE23 | Room: 136 | Speaker: Dwayne Jones

This hands-on presentation will teach the importance of designing a control panel for an onsite project that achieves the desired functions, meets the sites electrical restrictions, and is serviceable after the installation. Four control panels will be set up as stations for hands-on training. Different technologies capable of various flow and electrical requirements will be featured. During the hands-on portion of the class, attendees will be split into small groups and spend time with engineers from each technology featured. Participants will be able to ask questions and physically program the panels.

Portable Sanitation and Special Events

WE24 | Room: 233 | Speaker: Karleen Kos

Learn about the unique opportunities and challenges of providing portable sanitation at special events of all types and sizes. The PSAI has captured the latest thinking on key success areas and organized it so that you can follow the process from start to finish. The session will also cover how to communicate with your customers, prepare your bids, succeed on site, and troubleshoot problems. Some case studies will be used to give you a chance to think through typical scenarios.

From Standard Cleaning to "YOU WANT ME TO DO WHAT?" A Comprehensive Look at the Pipeline Cleaning Process

WE25 | Room: 240 | Speaker: Duane Johnson

This session is designed to be an intensive training on the effective use of pipeline cleaning equipment. Often as cleaning contractors, we find ourselves in situations that are beyond our normal type of project. These projects can either be a great opportunity or a potential for disaster. We will cover what tools are needed and what procedures should be followed to succeed in these situations. The focus will be on combination Jet/Vac trucks but will be useful for any pipe cleaning application.

CONFERENCE SESSIONS (cont.)

Wednesday, February 22 (cont.)

1:00 pm - 2:30 pm

Onsite Pump Sizing, Applications and Lessons Learned for the Service Contractor

WE26 | Room: 243 | Speaker: Deron Oberkorn

Proven selection and sizing of residential and light commercial effluent and sewage pump systems will be discussed. Other topics include pump capacity requirements; total dynamic head calculation; minimum pump run times and product life cycle; misapplied system voltage and its effects on product life cycle; and advantages and disadvantages of a simplex versus a duplex system. There will be an actual example of sizing a pump to a specific onsite application as well as lessons learned and problem solving.

Demo: Understanding the Power of Vacuum

WE27 | Room: 237 | Speaker: Phil Stein

The legendary Phil Stein, a consultant to the industrial vacuum industry, will present this interactive "nuts and bolts science lab" for first-time users and experienced vacuum truck operators. Topics include basic types of trucks, how pressure works, measuring vacuum and pressure, why hose diameter and length is important, viscous materials, air mover configuration, special operations, what to do when things go wrong, and major safety concerns. Note: this session will have close up camera projection onto the screen for attendee enhancement.

Elvis Wants to Leave The Building: How to End/Close the Business

WE28 | Room: 235 | Speaker: Roy Jay Montney

Shutting down your business can be an amicable/managed scenario OR forced upon you. During this session we'll discuss:

- Closing out your EIN and other tax accounts
- Planning for/dealing with death of a partner or a spouse
- Loss of income/reputation from theft, being sued, embezzlement
- When to file for bankruptcy
- Creating an Estate Plan or Transfer of Ownership contract
- Transferring insurance coverage

How To Motivate Your Employees And Get Your Team On The Same Side

WE29 | Room: 143 | Speaker: Mike Agugliaro

Does it feel like your team is a group of unruly individuals? How can you fix it? The answer could be that your organization lacks culture. Few business owners realize the importance of culture but they sure feel the difference when it's missing! Hear from the industry's leading authority on creating a powerful culture in your business.

Using Proven SOPs to Reduce and Control Your Sanitary Sewer Overflows

WE30 | Room: 231 | Speakers: John Pujol, Kent Carlson

Sanitary Sewer Overflows (SSOs) is the Gold Standard by which municipal sewer agencies are measured. EVERYTHING our hard working municipal employees do, is tied to this one, all important, no excuses, metric. This session will include an interview by an industry-recognized thought leader, with a highly accomplished career collections systems maintenance manager from the City of Los Angeles, in which insights into the City's massive challenges, its approach, and specifics about its Standard Operating Procedures will be revealed.

3:00 pm - 4:30 pm

The HOW and WHY of Effective Cementitious Manhole Lining

WE31 | Room: 133 | Speakers: Keith Walker, Ed Kampbell

This session provides a non-biased overview of the history and technology of cementitious liners of deteriorated brick, block and concrete manholes. The various defects and their corresponding particular solutions for reinforcing, sealing and protecting are explained from a practical experience point-of-view. A wall thickness design discussion for cementitious liners will also be discussed. The session will end with audience questions on manhole inspection, preparation and rehabilitation when using cementitious linings.

Case Study: Successful Repairs of Concrete Corrosion from MIC in a Septic Tank

WE32 | Room: 130 | Speaker: Jeff Rachlin

When is it appropriate to repair MIC induced concrete corrosion; what safety precautions will need to be taken; and what is needed in selecting the appropriate materials? Cleaning and prepping the site for the application of repair materials to repair concrete corrosion on the interior of the septic tank will be discussed.

Water Reuse and Individual Systems

WE33 | Room: 231 | Speaker: Colin Bishop

Water reuse is becoming more and more common as cities try and alleviate burdens on aging infrastructure and the impacts of drought. Larger cities are implementing water reuse programs and initiatives that take the responsibility off of the general public. But what about homeowners with onsite wastewater systems? How can they re-use their greywater in a way that won't impact their health or environment? This presentation will focus on challenges and roadblocks of combining water reuse and onsite wastewater systems.

It's Not One Size Fits All - Designing ATUs

WE34 | Room: 136 | Speaker: Allison Blodig

During this session we will discuss the NSF testing regiment and general criteria used to size larger versions of NSF tested units. It will also include how these units are not as easily applied to strict effluent requirements like low total nitrogen requirements or commercial applications. Design criteria that should be taken into account when addressing these applications will also be reviewed.

Down Time is Deadly! Keep Your CCTV Equipment Running While Lowering Your Costs

WE35 | Room: 240 | Speaker: Jim Aanderud

The cost of operating CCTV inspection equipment can come as quite a shock. When the equipment is down and pipelines aren't being inspected, wages are still being paid and projects are falling behind schedule. A single repair can easily exceed \$5,000. Human error, careless handling of the equipment and age of the equipment are the biggest culprits. During this session we will discuss what you can do to minimize downtime.

Specifying Pumps: Why Do Pumps Fail?

WE36 | Room: 243 | Speaker: Jeff Hawks

This session will focus on the differences between sump, effluent and sewage pump applications as well as the differences between sump, effluent, sewage and grinder pumps. Motors, bearings, impellers, seals and cord entrances will be discussed. We will share a brief overview on the different types of switches used in pumping applications as well as a basic checklist for diagnosing and troubleshooting common pumping issues.

Maximizing Water Jet Safety With Automation

WE37 | Room: 237 | Speaker: Sean Baker

Automated high-pressure waterblasting equipment is fast becoming the tool of choice for contractors who provide waterblasting services. Industry trends toward automated high-pressure cleaning equipment are continually increasing as benefits become more evident, including safety and productivity. During this session, we will discuss a safe zone job set-up, the best tool for each application, record keeping on set-up and operation, tips and suggestions for scheduled and preventative maintenance, and keeping maintenance records.

SOAR WITH THE LEADER.

Like the majestic birds they're named for, Lely's Eagle, Hawk and Falcon lines embody manufacturing vision, leadership and strength, to keep your profits flying. Choose standard or customized options.

Need a new pump truck? Don't settle for being just another one of the flock. Call or click today for soaring productivity and profitability with an Eagle, Hawk or Falcon unit from Lely Tank & Waste Solutions.

Our Eagle pumper truck line embodies manufacturing vision, leadership and strength, with options designed by professionals for professionals.

Our Hawk line offers portable restroom operators a selection of tough, specialized vehicles, built for reliable service and backed by a long history of innovation and personalized customer care.

LelyTank & Waste Solutions
800-FOR-LELY
Temple TX | Wilson NC | Reno NV
www.lelytank.com
the right people. the right truck. the right price.

Our Falcon line offers pumpers a selection of tough, specialized slide-in units, built for reliable service and an ability to navigate tight spaces. Their uncommon agility and versatility will have you soaring above the rest.

CONFERENCE SESSIONS (cont.)

Wednesday, February 22 (cont.)

3:00 pm - 4:30 pm

Computers Are Not Just for Kids: Off the Shelf Business Programs

WE38 | Room: 235 | Speaker: Dendra Best

Poor record keeping can get you in trouble with the tax man or the licensing agency, and can cost you some serious money. Learn how to choose the right software/business products for your business; how to set up a simple spreadsheet/data base; and how to use your products on a mobile platform. I'm sure you've heard you should back up, back up, BACK UP your business records! We'll also discuss those options and choices.

Kickstart Your Content Marketing: Leverage Your Social Presence To Gain New Customers and Lock In Their Loyalty

WE39 | Room: 143 | Speakers: Suzan Marie Chin, Mary Shafer

Wastewater industry veterans Susan Marie Chin and Mary Shafer help you benefit from the digital grapevine by integrating social media into your marketing. Learn how the major social streams work; how to write, distribute and repurpose effective press releases, use an email newsletter service and build good media lists. Discover how to build case studies and project profiles, repurpose feed content, and integrate social channels for maximum exposure and impact.

Watering the Seeds of Change

WE40 | Room: 233 | Speaker: Kerry Heaps

Are you ready to be inspired? Kerry's story will both motivate & inspire women to achieve success in this male dominated industry. As the daughter of a contractor, entrepreneurial lessons came early. She used the lessons she learned from her father to start her own successful magazine. Kerry's passion is to help other women entrepreneurs with their marketing efforts to continue their dream of running a successful business.

4:30 pm - 5:30 pm

3D Wireless Manhole Scanning

WE41 | Room: 133 | Speaker: Pierre Mikhail

3D Scanning is a relatively new technology. Currently, "3D" video and measurement is available, but utilizing the point cloud system means that manholes can only be measured from one point to another. With 3D scanning technology, manholes can now be documented in true 3D fashion, creating a mesh instead of a point cloud. The mesh can be used to document the structural change of a manhole before and after rehabilitation. We will also review existing manhole assessment technologies and their benefits.

Dealing With Tough Sites: Designs That Solve Problems

WE42 | Room: 130 | Speaker: Dave Gustafson

This session will cover what is needed to evaluate and understand tough OWTS sites; how to interpret the soils and other topographical challenges; understanding the site variables and how to incorporate them into the design; designing OWTS for complicated sites that will meet performance requirements and be sustainable. At the conclusion of the session the applicant will understand the knowledge and skills that are required to design effective, sustainable OWTS for challenging sites.

Sanitation Solutions for Challenging Environments

WE43 | Room: 231 | Speaker: Ethan Klem

Onsite wastewater systems can provide safe and usable sanitation for a lot of communities but there are always those that fall through the cracks. Whether the challenge is funding, geographical or technology, there will always be conditions that don't seem to fit into an easy solution. So how can we serve these community members? This presentation will focus on alternative solutions and how they can be implemented to improve community sanitation.

Proper Design - Putting the Pressure in Drip Distribution

WE44 | Room: 136 | Speaker: John Buchanan, PhD., PE

This session will focus on the hydraulic design of subsurface drip distribution systems. It will provide the knowledge needed to size the supply and return manifolds that service drip tubing, how to determine the number of zones needed, how to determine the friction loss in the filters, valves, and other components, and demonstrate proper methods for making connections within the hydraulic network. Once the hydraulic system has been designed, selecting the appropriate pump will be discussed.

Trenchless Technology Overview

WE45 | Room: 240 | Speaker: Dave Badgley

Collection systems are the wastewater utilities largest investment. The congressional budget office estimates an average of 71-98 billion dollars will be spent on water and wastewater systems through 2019. Trenchless technologies have become a major alternative to traditional digging for replacement for pipelines and maintenance holes. We will discuss problems such as infiltration, exfiltration, roots, corrosion, and structural defects; where trenchless technologies can be used; and technology used for replacement and rehabilitation of pipelines and maintenance holes.

Are You Pricing Yourself Out of Business? - All You Need to Know to Sell Profitably

WE46 | Room: 143 | Speaker: Frank Taciak

Are you ready to price yourself into more business? Pricing doesn't have to be difficult. In fact, it can be simple and quick! With a few effective strategies, you will never underbid a job again. Real sales success comes from understanding the true cost of doing business and pricing accordingly. Sell your way into a more profitable future!

Coating Needs for Sanitary Sewer Structures: What is Best, and Why?

WE47 | Room: 233 | Speaker: Tom Godbey

A significant engineering challenge in water and sewer rehabilitation is to determine which coating product is best suited for the environment in which it will be used. Understanding the benefits and limitations of coatings is critical. There's a multitude of coating products available for consideration. We'll review them, discuss how they work, and determine scientifically just how to select the appropriate product for your project.

What You Should Know About Aerobic Treatment Unit Biology

WE48 | Room: 237 | Speaker: Doug Dent

This session covers all Aerobic Treatment Unit (ATU) designs, suspended growth, fixed film systems, and provides information on nitrification and nitrate removal. How to service ATUs from start-up to full service will be discussed and maintenance requirements will be provided.

Using New Technology for Fast Collection System Assessment

WE49 | Room: 235 | Speakers: Michelle Harrod, Nick Kordecki

In 2016 the Village of Algonquin started a full sewer system inspection program to create a benchmark for future O&M intervals and to find any system failures and remedy the problem before it created sewer backups or overflows. The project required collaboration with residents to access sewer lines located in backyard easements and real time access to field data collection integration over GIS. This session describes the development of the project, results of the study, challenges, and lessons learned from an "all digital" format.

Women in the Industry Social Hour

WE50 | Room: Wabash 1 Lobby

Here's a chance for you to meet other women in the wastewater and environmental services industries, or to reconnect with those you met last year. Whether you are new to the industry or have decades of experience, this networking event is for you. Share ideas, find answers, discuss challenges, or just have some fun over a glass of wine or beer. After a long day of education sessions - plan to unwind at this social hour. Registration is required.

Thursday, February 23

7:30 am - 9:00 am

Be The Leader Committed to Safety

TH01 | Room: 240 | Speaker: David Miguel

Are you committed to the safety of the men and women who are impacted by your decisions? This presentation will delve into what it means to be a leader in the utility construction business. Through an examination of the Titanic tragedy as it relates to several local fatalities in the utility construction business, you will realize how your decisions impact your employees' welfare. We will explore why so many get hurt or killed in our business and discuss what we as leaders can do about it.

Excavation Safety Practices

TH03 | Room: 237 | Speaker: Gary Hooks

This session will provide an overview of current safety practices and standards as outlined in the recently updated OSHA Standard Subpart P. This includes breaking down and defining the excavation safety regulations. Proper usage of sloping, shoring and shields used for securing an excavation will be reviewed as well.

Nozzle Physics: Unravelling All the Information About How Nozzles Work

TH04 | Room: 133 | Speaker: John Pujol

There are a dizzying array of nozzle choices available today, at a very wide range of prices and styles. Owners, operators and managers want to know which tools are the best for their application. With nozzles evolving at an accelerated rate, how can anyone decipher what matters, in order to make the best decision possible? This session is designed for you to feel a lot more confident about your next purchase!

DeCentralized Wastewater-Onsite Wastewater Operations and Maintenance

TH05 | Room: 243 | Speaker: Rick Allen

The definition of decentralized wastewater treatment and how it applies to more than just septic tanks will be discussed. There are many options for residential, industrial and even municipal wastewater treatment that fit the definition. Information will be provided on how to properly handle septic waste when it is discharged to your plant, and why you should or should not consider these materials being discharged to your system.

7:30 am - 8:30 am

The Impact of Private Property Rainwater Connections to the Sanitary Sewer

TH06 | Room: 143 | Speaker: Ron Thomann

Sanitary Sewers are designed to transport and treat domestic wastewater flows. Extraneous flows from sources of rainwater or groundwater can overload systems resulting in sewer backups into basements and overflows into streams and creeks. Studies show the majority of Infiltration/Inflow (I/I) entering wastewater collection systems is contributed from private property. Focus will be given on the impact of private property I/I, types of private property I/I, how cities are dealing with the issues, and program expectations.

CONFERENCE SESSIONS (cont.)

Thursday, February 23

7:30 am - 8:30 am

What Is a Failed Leach System? Proper Diagnosing & Options for Repair

TH07 | Room: 130 | Speakers: Clay Barks, Jerard Nighorn

How many times have you wanted to help your customer by diagnosing the real problem with their septic system? We can help you do that! During this session we will discuss diagnosing a leach system failure and potential options of repair. We'll cover various septic system types such as at grade septic, mound systems, sand filter beds, pressure dosing systems and aerobic systems, along with various methods of determining a failure in each type. We will then cover options for repairing the system. When you leave this session you will be much better equipped to diagnose and restore a failing leach system.

On the Ground or in the Cloud: Advancement in Data Storage Solutions

TH08 | Room: 235 | Speaker: Mike Russin

Traditionally, sewer inspection professionals chose on-site data storage methods instead of cloud storage. However, as technology advances so do the uptime, reliability and speed of cloud storage. Is it time to reassess cloud storage? Is it still advantageous to rely on on-site storage of data? We'll be taking a closer look into different data storage solutions to help attendees understand which method is best suited for their sewer inspection workflow.

Preparing for the New Consumer - How You Can Acquire and Retain New Business

TH09 | Room: 136 | Speaker: Beth Berry

Fifty-five percent of Millennials say their customer service expectations have increased in the last three years, and 50% have stopped doing business with at least one company due to poor customer service in the last year. Many of us have built best practices around serving Baby Boomers, but in 2017 Millennials will outspend Baby Boomers. This is a must see event to learn how women can capitalize on this opportunity in a male dominated industry.

7:30 am - 11:30 am

Fundamentals of Municipal Grouting for Engineers, Municipalities, and Entry Level/Limited Experience Contractors

TH02 | Room: 233 | Speakers: Don Rigby, Marc Antcil, Ron Manestar

This 4-hour comprehensive course delivers base-line knowledge on how & why injecting grouting stops I&I. Holistic approach includes mainlines, manholes, service laterals and connections. Grouting is the most cost-effective method for sealing all points of entry. Expert tutorial with three instructors, videos, and table-top demonstrations. Engineers gain insight on performance specs for standalone solution or complement to CIPP Lining. Municipalities may choose to self-perform or outsource. Take-away for contractors—execution is everything.

7:30 am - 4:30 pm

NOWRA One-Day Installer Class

NOWR | Room: 231 | Speakers: John Buchanan, PhD., PE, Sara Heger, PhD

This Installer Training Program is designed to convey nationally focused best practice standards for onsite wastewater treatment system installation processes as identified by industry stakeholders through an intensive national review process. These materials describe the essential knowledge, skills, and abilities professionals who install onsite wastewater treatment systems should possess. The material will include an Introduction to Onsite Systems, Safety, Soil and Site Concepts, Construction Materials and Techniques, Planning, Distribution, Watertight Piping and Tanks, Dosing Systems and Controls, Advanced Treatment and Soil Treatment Areas.

9:00 am - 10:00 am

Are You the Expert You Think You Are? The Best Way to Handle Sewer Lateral Inspections Profitably

TH10 | Room: 143 | Speaker: Frank Taciak

Where are your lateral sewer line inspections taking your company? Are they a powerful growth provider for your business? They can be! Learn the best way to diagnose, price, and sell lateral sewer line repairs profitably! You can be the expert customers crave!

Strengthening the Family Business - Critical Conversations and Exercises

TH11 | Room: 136 | Speaker: J. Kelly Newcomb

This session will be very beneficial for attendees who are in the Portable Restroom Rental Business with other family members. The presentation will involve critical conversations and exercises to help you get serious about strengthening your relationships with your family members in the business.

Don't be Afraid of Grease

TH12 | Room: 130 | Speaker: Jerard Nighorn

Every day grease is flowing, emulsifying, coagulating, plugging, capping and creating major problems. From drainfields, grease traps, drain lines, pump stations to holding ponds, grease is a major problem in our industry. Grease anatomy is often misunderstood. Let's discuss the anatomy of grease and the science behind different treatments. We will break down the grease molecule to its simplest form, and discuss the various methods available for proper treatment and disposal.

Choosing the Correct Tank for Your Application

TH13 | Room: 235 | Speaker: Kurt Mannel

What should you consider when buying a new septic and portable restroom service truck? During this presentation, we will go over GVWR, chassis CTA, tank material, coatings, vacuum pumps or blowers, level indication and other tank components. It is important to choose the correct equipment and tank sizes because most tank failure is a result of incorrect equipment.

9:30 am - 10:30 am

Want More Profit? Follow These 4 Strategies with Your Team

TH14 | Room: 133 | Speaker: Michelle Hogan

Your employees are your greatest asset. A staff that possesses experience, efficiency, engagement and interest in your business can directly bring you more sales and profits. Specific proven methods to engage your employees to maintain and improve your all-important client relationships will be discussed.

An Explosive Look at Cross Bores Through Sewers

TH15 | Room: 237 | Speakers: David Hamberlin, Ron Thomann

Directional drilling installed at greater depths has created a problem with cross bores through sewer mains and service laterals. Gas and electrical lines directionally drilled through sewer pipes pose a life threatening situation. The perspective is taken from sanitary sewer system evaluation surveys conducted throughout the Midwest. The ultimate goal of this presentation is to inform and educate attendees of the concern for cross bores through sanitary sewer pipes.

9:30 am - 11:00 am

Confined Space for Utility Construction Impact Talk

TH16 | Room: 240 | Speaker: David Miguel

Through an examination of confined space incidents, we will examine why they happen so often even though we have so many rules, regulations, and safety equipment available to us.

U.S. Design Patent #: D802,241 PATRIOT 1776 DOLLY JETTER

The Patriot 1776 Hydro Jetter was designed to be very compact and easy to load & unload from your work vehicle. Equipped with a oversized 23 HP V-Twin engine, the Patriot 1776 generates 3500 PSI at 5.5 GPM and our upgraded model 8.5 GPM. Standard features include a Piranha 3/8" 300 FT red jetter hose with reel. Remote start for 1 man operation. Hour and battery gauge to keep track of health of battery and also maintenance of hydro jetter. Flat free tires are made of solid polyurethane foam, non-marking.

The Patriot 1776 Hydro Jetter is equipped with a quick connect fitting to allow you to add on our optional quick connect hand reels for hose sizes (1/8" and 1/4"). Each Patriot 1776 Dolly Hydro Jetter is built by hand at our facility in California. Customers have the option (additional charge) to customize their Patriot 1776 Dolly Hydro Jetter to match their company colors. We use only quality stainless / brass fittings. No cheap fittings!

PHONE: 888-318-9888

ONLINE: WWW.PATRIOT.US

VIEW THE PATRIOT 1776 JETTER AT OUR BOOTH 1417

CONFERENCE SESSIONS (cont.)

Thursday, February 23 (cont.)

9:30 am - 11:00 am

Bio-Nutrient Removal

TH17 | Room: 243 | Speaker: Rick Allen

With emerging mandates on managing nutrient loading/contaminants, there are additional regulatory concerns. Technical information on alternatives to mechanical solutions will be reviewed and some case studies of how treatment solutions work on mitigating these contaminants will be presented. We will discuss the environmental impact of nutrients and specifically looks at nitrates and phosphates in waterways and systems, and make connections to the ecological impact like measuring for nutrient loading and pharmaceutical loading.

10:30 am - 11:30 am

Wouldn't It Be Great to Run Your Contracting Business With Less Stress and More Success?

TH18 | Room: 130 | Speaker: Alan Levi

Gain control at your company. Master the systematic "7-Power" approach to implement and activate planning, operating, financial, staffing, selling, marketing, and sales coaching power in your company. This approach will allow you to run your contracting business with less stress and more success.

16 Secrets to More Success in the Portable Restroom Business

TH19 | Room: 136 | Speakers: Mike Adams, J. Kelly Newcomb

If you are in the portable restroom business or thinking about getting into the business, this session is for you. How to build lasting relationships with people you trust, how to get to know your customers, and knowing the market and competition will be discussed. The drivers that lead to greater sales will be reviewed. We'll also discuss choosing the hauling and pumping options that are right for you.

Vacuum Truck Maintenance - For Maximum Life and Efficiency

TH21 | Room: 143 | Speaker: Bill Jones

This session will cover information required to examine, troubleshoot and diagnose problems with vacuum trucks including being able to see and anticipate problems before they occur. Systems discussed will include trucks, tanks, vacuum pumps and interrelated accessories. Repair or replacement of vacuum pumps and their systems and water pumps will be evaluated. Various techniques to prolong the life and reduce costs will be presented.

Green Productivity Through Water Recycling

TH22 | Room: 235 | Speakers: Brian Smithmeyer, Kevin Pfau, Gary Nink

How can sewer water recycling double your sewer cleaning productivity? We all recognize the importance of conserving our natural resources. What if your city could make a significant impact on improving the way you manage your fresh water resource? What if you could double the productivity of your collection system maintenance at the same time? Sewer water recycling provides an avenue to conserve not only our fresh water resource but another very important resource, time.

11:00 am - 12:00 pm

Understanding High Strength Wastes

TH20 | Room: 237 | Speaker: Kevin Sherman

High-strength wastewaters exceed generally accepted concentration limits for domestic wastewater for one or more waste strength measures. These measures will be explained in detail and examples of facilities most likely to generate that type of high-strength waste will be given during the presentation. Tips and tricks for calculating organic loads and how to protect soil absorption areas from damage from grease will be explained during this presentation.

The Science of Pipe Cleaning

TH23 | Room: 133 | Speaker: Ken Billingham

Explore the relationship between flow and pressure and how making better operational decisions can translate to improved efficiencies, reduced costs and a safer work environment. We will examine current operating procedures and some new insights to bring the whole process to a higher level.

Friday, February 24

7:30 am - 8:30 am

Building a Sales Funnel: How to Connect the Dots

FR01 | Room: 130 | Speaker: Ori Staub

Many companies are guilty of "doing online marketing" without a clear understanding of how a stranger becomes a customer. This results in failing campaigns that have minimal impact on bottom line results. That's why every company needs an inbound sales funnel. In this session, we will define the inbound sales funnel, explore common issues associated with it, and offer practical advice for making sure your marketing efforts support it.

Hydrofluoric (HF) - The Most Dangerous Acid

FR02 | Room: 235 | Speaker: Michael Serpe

Hydrofluoric Acid (HF) is one of the most toxic and potentially dangerous substances used in Water Purification. All users of HF should be fully aware of and have a good understanding of the nature of HF & know how best to control HF, avoid accidental exposure and understand how to deal with accidental exposure; with a focus on hazard recognition and risk assessment and control.

Hazardous Atmospheres and Gas Detection for Sewer System Confined Space Entry

FR03 | Room: 136 | Speaker: David Miguel

During this presentation an overview of the dangers of hazardous atmospheres in sewer system entries will be provided. A technical explanation of the gases involved and the proper use and maintenance of gas detection equipment will also be covered.

JET UP!™ Taking Science to the Sewer®!

FR04 | Room: 233 | Speaker: Scott Paquet

Skillful jetting truck operators can reduce the number of passes used to clean sewers, thereby extending equipment life, reducing fuel costs, and cleaning more pipe in a day. Powerful jetters are important, but pressure must be calibrated to produce tight, laminar-flow jet streams that clean effectively. This presentation covers calibration, correct technique, jet sizing, how and why to test truck pressures, invoicing, system control, and sewer cleaning safety.

Manhole Rehabilitation Pilot Study Results: Comparing Geopolymer Lining System to Traditional Cementitious Liners

FR05 | Room: 237 | Speaker: Steve Henning

The City of Cheektowaga, New York conducted an extensive field study to uniformly compare multiple manhole rehabilitation products. The study ultimately included four distinct products. Each product was installed on 56 manholes. The manholes were evaluated immediately after installation and again at a later date. The results of this comprehensive study will be discussed as well as NASSCO inspection guidelines.

Vacuum Truck Applications

FR06 | Room: 133 | Speaker: Ryan Rozycki

Attendees will be provided with a brief overview of how to apply vacuum truck equipment in today's market based on the application and type of work trying to be accomplished. During this session we will cover which trucks are not suitable for specific applications and the damage that can occur.

Your Trusted Source for Quality Control Panels.

888-733-9283 | www.seewaterinc.com

WWETT BOOTH: 2584

QUALITY ENGINEERED CONTROL PANELS

See Water, Inc. provides proprietary electronic control panels for the commercial, industrial, and utility industries. For over twenty years, See Water has innovated the industry by providing high quality pre-engineered products that offer ease of installation and unwavering reliability.

- High Quality Compact Design
- OEM Solutions
- Transducer & VFD Capabilities
- Three-Year Warranty

CONFERENCE SESSIONS (cont.)

Friday, February 24 (cont.)

7:30 am - 8:30 am

PSAI Service Training for Portable Sanitation Professionals and Certification Exam

PSAI | Room: 231 | Speaker: [Flay Anthony](#)

The PSAI's Service Training for Portable Sanitation Professionals provides a broad overview of the standards for excellence in the field. We will cover: unit construction; servicing of all types of units and trailers; safe loading and driving techniques, vehicle inspections, accidents and documentation requirements; - placement of units; waste disposal; inspection/repair of units; health concerns and infection control. The course will conclude with the exam for those seeking a credential in the portable sanitation field.

8:30 am - 12:30 pm

Soils for Septics - Comprehensive Course

FR07 | Room: 143 | Speakers: [Paul Finnell, Sr.](#), [Dena Anderson](#)

This 4-hour comprehensive course will provide an introduction to soils treatment capacity depending on composition and code. We will spend time on PERC tests and visual appearance. We will demonstrate how to work with the soils you have (feel free to bring your own soil sample to this session), and discuss how to work with a soils scientist and within your local code compliance. When you leave this class you will understand soils maps and mapping tools. This will be a hands-on class with many samples, demonstrations and activities. An HD video will be used to project some real-time images on the screen for a better/closer learning experience.

9:00 am - 10:00 am

Website Optimizations for Beginners: How to Improve Search Rankings

FR08 | Room: 130 | Speaker: [Ori Staub](#)

Last year Google served up results for over 2 trillion searches. Many of these searchers were for specific products, services, or solutions, resulting in a massive opportunity for businesses that ranked well. In this session, attendees will learn the basics of search engine optimizations (SEO) and how to build an effective website that will draw in the right audience and beat out the competition.

Valuable Lessons from the Global Survey of Sewer Cleaning and Maintenance

FR09 | Room: 136 | Speaker: [Dr. Jey K. Jeyapalan, P.E.](#)

New cleaning equipment at 3,000 to 30,000 psi, are being trialed to remove sewer blockages and sediments. Before one can evaluate the merits of high-pressure, low-volume jetting machines over low-pressure, high-volume type, the users have to understand the overall landscape of sewer cleaning and maintenance. The speaker shares the responses to 15 questions from a global survey of sewer agencies, cleaning companies, engineering firms, and manufacturers.

9:00 am - 10:00 am

To Work Safely Is To Understand Safety

FR10 | Room: 233 | Speaker: [Chris Lopez](#)

One cannot dispute the fact that the water/wastewater industry requires a great understanding of safety. Throughout any organization, safety relies on an understanding of the many aspects of a safe and compliant workplace. There are tremendous varieties of opportunity in our industry. Take this opportunity to attend this widely acclaimed safety presentation. This presentation will demonstrate the concept, to work safely is to understand safety.

Case Study: Franklin Township Sewerage Authority's Point Repair Rehabilitation Program

FR11 | Room: 237 | Speaker: [Nick Sebastian](#)

In 2016, Franklin Township Sewerage Authority decided to invest in a point repair solution that they could perform themselves to abate infiltration points. With their new point repair program, they've been able to rehabilitate pipe segments within an hour. The cost savings from this program has been substantial, sometimes as much as 80% less than what they were paying contractors to come and reline pipes.

Vacuum Truck Hydraulic System: PTO, Transercase, or Belt Driven

FR12 | Room: 133 | Speaker: [Ryan Rozycki](#)

During this session we will discuss the different hydraulic and mechanical power systems provided on vacuum trucks, such as transmission mounted PTOs, front or rear engine PTOs, auxiliary engine transfer case, direct drive hydraulic pumps and belt driven hydraulic pumps. The mechanical output produced by each method of power, the horse power requirements to operate each system, and properly maintaining your vacuum trucks equipment will also be discussed.

Historical Evolution of Onsite Biofiltration Leading to Modern Innovative Solutions

FR13 | Room: 235 | Speaker: [Marie-Christine Belanger](#)

From barely existent public sanitation efforts before the 1800s to the advent of modern legislative efforts to protect soils from waterborne pathogens, this session presents the evolution of biofiltration technologies within the context of hundreds of years of wastewater treatment innovations. Comparing several conventional soil-based systems, the presenter will explain how biofiltration integrating inorganic and organic media evolved into an efficient, compact solution now recognized as better-adapted to today's site realities.

10:30 am - 11:30 am

Hook, Line & Sinker: Essential Online Elements That Engage, Educate and Convert

FR14 | Room: 130 | Speakers: [Suzan Marie Chin](#), [Mary Shafer](#)

Face it, your future is on the Web! In this era of social media marketing, a results-oriented online presence is all about effective content. With combined 35 years in the wastewater industry, Suzan Marie Chin and Mary Shafer make this session the perfect blend of relevant new media backed by traditional, results-based concepts. Learn what your website needs to actively drive new business.

Sodium Hypochlorite - More Dangerous Than You Think?

FR15 | Room: 235 | Speaker: [Michael Serpe](#)

Sodium Hypochlorite is a Category 1 OSHA GHS Target Organ Health Hazard for severe damage to the respiratory system. It causes severe skin burns and eye damage. During this session we will review of use of Sodium Hypochlorite (SHC) in Municipal Water Works water purification treatment. We will discuss the hazards of chlorine gas. We will focus on the potential hazards posed by sodium hypochlorite and best practices for handling and working with sodium hypochlorite.

Tackling Water Utility Challenges Using Completely Portable Inspection Systems

FR16 | Room: 233 | Speaker: [Cody Warner](#)

The presentation will cover some of the major challenges facing water utility professionals in their day-to-day operations, while outlining viable solutions through the use of underwater inspection equipment, in particular mini-remotely operated vehicles (ROVs) and pipe crawlers. We will draw on real life examples to convey our point and welcome discussion/questions.

Rockland County Interceptor Sewer Rehabilitation

FR17 | Room: 237 | Speaker: [Joseph Cherry](#)

When a scheduled five-year CCTV inspection by Rockland County Sewer District No. 1. revealed the near failure of a 750 lf, 36" RCP sewer interceptor, with missing rebar and exposed soil, department officials needed to act quickly. Working with contractors, they inserted rolled and banded lengths of sheet steel, then applied layers of CentriPipe PL-8000, a high-strength, fine-aggregate cementitious material, for a structurally sound and successful rehabilitation.

CONFERENCE SESSIONS (cont.)

Friday, February 24 (cont.)

10:30 am - 11:30 am

Liquid Waste Processing

FR18 | Room: 133 | Speaker: Therese Wheaton

During this session we will discuss solving liquid waste disposal issues from small to LARGE We will share with you how others are building small, Medium and LARGE processing systems and meeting the most stringent governmental guidelines for pennies a gallon. Go on this journey with us to see advances we have made this last year.

Modern Remote Monitoring

FR19 | Room: 136 | Speaker: Cory Lyon

Attend this session to learn how modern remote monitoring systems can be leveraged to maximize system performance. We'll discuss troubleshooting and calibration of various control system features and how they can be used to optimize treatment performance. We'll also review how proper control system installation and configuration can simplify system O&M. Finally, we'll cover resources and tools that are available to help you optimize system operation.

12:15 pm - 2:00 pm

Technical Tour: Belmont Advanced Wastewater Treatment Plant

TT01 | Shuttle Bus pickup at Maryland Street Exit

You will tour the Secondary Treatment System and Control Room at the Belmont Advanced Wastewater Treatment Plant. The Plant has a capacity of 300 million gallons per day (MGD) and accepts flows from a combined sewer system. The secondary treatment system includes an air nitrification system installed in 2012 and an oxygen nitrification system that was constructed in 1967. The oxygen nitrification system was converted to an air nitrification system in 2012 and expanded to handle wet weather flows of 300 MGD.

This tour is outdoors. Please dress appropriately. It can be very cold in Indianapolis in the winter. Personal protection gear will be provided.

Note: the actual tour is one hour in length. The additional time includes travel time and loading the bus.

2:00 pm - 4:00 pm

DigIndy Tunnel Tour

TT02 | Shuttle Bus pickup at Maryland Street Exit

Citizen's Energy Group is constructing one of the largest infrastructure projects in the State of Indiana. The tunnel is approximately 250 feet below the surface of Indianapolis, with a bore diameter of 20 feet, a finished diameter of 18 feet, and will be 28 miles long when completed in 2025. The tour will offer a view of the second phase of the project that has recently started. You'll view the progress 250 feet below the surface in a man cage, and then brought back to the surface.

Note: the actual tour is one hour in length. The additional time includes travel time and loading the bus.

EXHIBITOR DEMO SCHEDULE

HammerHead, Booth 5208

HammerHead Trenchless

CIPP Lining and ReinstatementThursday & Friday | 10:30 am – 10:50 am
Learn about the full line of HammerHead cured-in-place pipe (CIPP) & Picote cleaning and reinstatement solutions. See live demonstrations of liner inversion and Picote reinstatement tools.

Point Repair and Pipe CoatingThursday & Friday | 1:30 pm – 1:50 pm
Live demonstrations of HammerHead point repair solutions and Picote brush-cast coating system. Point repair solutions repair pipes from 3 to 60 inches even during active infiltration. Brush-cast pipe coating systems are an economical way to rehabilitate 1-1/4" to 12" pressure pipes.

I.S.T. Services, Booth 6333

Get the upper hand on your competition! Visit booth 6333!

I.S.T. Services will be presenting a series of new and exciting pipe rehabilitation, and inspection technologies. Live demonstrations at booth #6333 will include spray and brush casting using the ElastoTec, point repairs using IST spot repair kits, and manhole rehabilitation seminars using MC MRT technology from Germany.

Thursday, February 22 and Friday February 23

Manhole Rehabilitation 9:30 am - 10:00 am | 1:00 pm – 1:30 pm
CCTV Inspection Cameras.....10:00 am - 10:30 am | 1:30 pm – 2:00 pm
Elastotec Spray/Brush Casting11:00am - 11:30 am | 2:00 pm – 2:30 pm
Spot Repair.....11:30 am - 12:00 pm | 2:30 pm – 3:00 pm

Perma-Liner Industries, Booth 3423

Zero Dig CIPP Solutions - Perma-Liner™ will be demonstrating the range of our 100% zero dig CIPP solutions. We rehabilitate everything from the laterals, to the mains and the connection between the two – sealing the entire system. American Made, American Proud!

Thursday.....10:00 am
Thursday.....4:00 pm
Friday10:00 am
Friday4:00 pm

Visit Picote Solutions in Booth 4316 for a complete Live Demo schedule!

WWETT LIVE! SCHEDULE

Taking Science to the Sewer – NozzTeq® makes the most innovative and effective sewer nozzles and cutters available. Our nozzles are engineered to preserve smooth flows from truck to nozzle end, so jet streams are tight and powerful, even at lower pressures. See our live demos in the Lucas Oil Stadium and learn how to clean sewers better, faster, with fewer passes and less fuel; that's what science is for!

Thursday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm
Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm

Vactor will assisting Nozzteq's nozzle demonstration with the use of the Vactor 850R All Weather Truck Jet. Come see the power and capability of the Vactor 850R Jet Truck.

Thursday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm

AllJetVac Recycler saves water, triples productivity - AllJetVac combination sewer cleaner with a Recycler option saves water and time by vacuuming water from sewer lines, putting it through a multi-step filter process, and then re-using the water to continue jetting. The system saves water, eliminates shut-downs to refill water tank and saves fuel. The process saves millions of gallons of water each year, and enables one jet/vac unit to handle the work of three similar sewer cleaning units that do not have a Recycler advantage ... tripling the productivity potential.

Thursday 12:00 pm - 12:30 pm | 2:00 pm - 2:30 pm Friday12:00 pm - 12:30 pm | 2:00 pm - 2:30 pm

Dare to Compare Live Demo - Come and see for yourself the difference between basic Tier 1 and 2 nozzles compared to high efficiency Tier 3 nozzles. The KEG test setup equipped with flow meter, pressure indicator and load cell, takes out all the guesswork, you will see exactly the power of each nozzle tested. Learn how Tier 3 nozzles can save man hours, clean lines better, faster and reduce wear and tear on your equipment.

Thursday 12:00 pm - 12:30 pm | 2:00 pm - 2:30 pm Friday12:00 pm - 12:30 pm | 2:00 pm - 2:30 pm

Lateral Lining with the Quik-Shot System - The demo is lining of a lateral sewer. Will measure, impregnate with resin, vacuum, calibrate and invert into a pipe. Then inserting a calibration tube and using the Quik-Heater to cure the liner. This is accomplished with the compressor and generator mounted in our 16 ft trainer on display.

Thursday12:30 pm – 1:00 pm | 2:30 pm – 3:00 pm Friday 12:30 pm - 1:00 pm | 2:30 pm – 3:00 pm

CIPP LED Light Curing System - Blue Light CIPP lining system for laterals and small wastewater pipes that combines the advantages of felt-carriers with LED light cure and offers approved working solutions for special needs and circumstances found in laterals and small diameter wastewater pipes.

Thursday12:30 pm – 1:00 pm | 2:30 pm – 3:00 pm Friday 12:30 pm - 1:00 pm | 2:30 pm – 3:00 pm

SAFETY ZONE SCHEDULE AT WWETT LIVE!

ZONE 1

ultraSHORE PRODUCTS **TRENCH SHORING SERVICES**

Build-a-Box Modular Trench Boxes

presented by Greg Cooke, Trench Shoring Services

OSHA Requirements and solutions to every day shoring problems.

Thursday.....1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm | 4:00 pm – 5:00 pm

Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm

ZONE 2

Confined Space Entry Equipment

presented by Dave Miguel, Underground Safety & Supply

Thursday.....1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm | 4:00 pm – 5:00 pm

Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm

ZONE 3

Sewer Pipe Plug Inspection and Usage

presented by Greg Danaher, Cherne Industries

Demonstrate how to properly test a pipe plug prior to use and how to do a sewer air test.

Thursday.....1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm | 4:00 pm – 5:00 pm

Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm

ZONE 4

Vacuum Truck Safety

presented by Tom Ferrero and Kim Seipp, NAWT

Truck provided by Pik Rite.

Thursday.....1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm | 4:00 pm – 5:00 pm

Friday11:00 am – 12:00 pm | 1:00 pm – 2:00 pm | 2:30 pm – 3:30 pm

www.earthbuster.com/

hen a septic drain field fails, it's often because the soil—not the septic tank or the drain pipes, but the soil itself—is clogged up and compacted. This keeps the fluids from the septic tank from being able to drain out into the soil like they are supposed to. Contractors who use EarthBuster for septic drain field remediation earn strong profits, so they can generally pay back the investment in about 10 jobs. The EarthBuster has a US patent and has been in service over 10 years.

IMPREG LLC 6608

8000 Whitepine Road | Richmond, VA 23237
Phone: 8049801443 | Email: aroberts@impreg.com
www.impreg.com

IMPREG offers the latest innovation in CIPP UV-cured GRP liner solutions, up to 63 inches, including non-round shapes. Our system utilizes fiberglass reinforcement and advanced resin configurations, addressing today's gravity sewer and culvert rehab needs. UV technology allows the liner to cure more quickly than other techniques, thus getting your pipeline back into operation sooner, and using less energy for a "greener" rehab solution. Please visit us at Booth 1226 and at www.impreg.com.

In The Round Dewatering 2560

PO Box 219 | Clayton, IN 46118
Phone: 317-563-2072 | Email: jamespenner@tds.net
itrdewatering.com

In The Round Dewatering offers user-friendly horizontal dewatering drums mounted on roll off frames. They can dewater 18,000 to 25,000 gallons per fill, providing liquid-free material overnight. The drum provides results with any material that will flock, including grease. Filling can be done multiple times prior to rotation, and the unit makes one turn every two hours, usually overnight. It is energy efficient, as it only requires 1/4 hp to operate. Multiple size units are available.

www.backwatervalve.com

Mainline Backflow Products manufactures backwater valves designed to prevent sewage from backing up into homes as the result of a municipal sewer backup. Our products are unique in design and function: from clear view open gate to extendable valves, we cover most residential applications. We also manufacture internal fitting Flush Caps and Inspection Chambers which are designed to allow municipal access to the main lateral of a building/home without needing access to the building.

MANHOLE GUARD1500

3409 INDUSTRIAL 27TH STREET | FORT PIERCE, FL 34946
Phone: 800-782-4134 | Email: Felix@manholeguard.com
www.manholeguard.com

Use a MANHOLE GUARD for Open Manhole Safety! It's a cost effective safety device. The MANHOLE GUARD is durable, lightweight and easy to handle. The bright color provides a visual warning for the public and workers. Minimize liability and reduce slips and falls. It also decreases the cost of replacement tools. The optional hose guide reduces wear on jetter hose. Other options include a lid, bypass kit and lighting kit.

Phone: 972-864-1015 | Email: mike@meps.com
www.meps.com

Mobile Power is the sole manufacturer of the MEPS Power Systems. Our systems are engine-driven from the crank, and will generate 3,000-15,000 watts of pure sine-wave AC power in both on the move or stationary situations. We maintain frequency through our crystal controlled circuitry independent of an engine's RPM. MEPS systems provide more power at engine idle to meet the growing needs of this industry, and YES, you can easily relocate from manhole to manhole without any loss of power.

Reed provides piping solutions for water/wastewater industry. Reed tools are backed by a Lifetime Warranty.

Reelcraft Industries, Inc. 1572

2842 E. Business Hwy 30 | Columbia City, IN 46725
Phone: 800-444-3134 | Email: ross.mcgregor@reelcraft.com

Why use hose reels? Because they make hose handling more efficient and safer. Your hoses, cables and cords will last up to five times longer. You will improve hose management, which decreases labor costs. Your chances of injuries from tripping hazards will decrease, which saves lost work time, medical bills and higher insurance. You also save the expense and time to replace expensive hoses, cables and cords that get run over by fork lifts and other vehicles.

2596 Dunwin Drive | Mississauga, Ontario L5L 1J5 | Canada
Phone: 416.302.9482 | Email: info@riptideetek.com
www.riptideetek.com

Riptide Tek is a manufacturer of smart wireless liquids levels detection technologies. Our FOGMonitor ultrasonic detection system reliably measures layers of FOG (fats, oils and grease) down to the solids layer within a grease interceptor and relays this information wirelessly within the facility. The quick and easy-to-install set-up negates the necessity for costly wired installs, while providing relevant information at a glance. FOG-monitored and properly maintained interceptors can be granted extended pump out cycles, further providing cost savings to the facility.

Roto-Rooter Corporation..... 1516

255 E 5th St #2500 | Cincinnati, OH 45202
Phone: 800-848-3375 | Email: thad.reinhard@rrsc.com
rotorooter.com

In 1933, Samuel Blanc created a sewer machine from a 1/6 HP Maytag washing machine motor, roller skate wheels and 3/8" cable. It used a combination of special blades to cut tree roots out of drains – no digging required. Sam's wife Lettie christened it the "Roto-Rooter." Today, Roto-Rooter operates in more than 100 company-owned branch and independent contractor territories and approximately 500 independent franchise locations, serving about 90% of the U.S. population and parts of Canada.

NEW & IMPROVED
12" model

THE SHOOTER®

Mobile, user-friendly design for fast, continuous air-inversion.

- Self-lubricating
- Mechanical gate valve
- Fits 6" to 12" liners
- Larger model available for up to 24" liners

Emagineered SOLUTIONS

HYDRO-EXCAVATING

Suttner America has engineered a **turbo nozzle** specifically for hydro-excavation digging. In addition to it's **1/2" inlet**, modifications have been made to withstand the harsh environment that comes with hydro-excavation. Available in many orifice sizes.

A new ergonomic inline design, our **Inline spray gun** is now offered in 1/2" for hydro-excavating applications. Along with our **1/2" high pressure (6000 PSI) hose** to complete your set up.

SEWER JETTING

Suttner America's tier 1 and 2 **sewer jetting nozzles** are durable under severe and demanding jetting conditions.

Precisely drilled orifice inserts included

Suttner America's **sewer jetting hoses** are reinforced with steel wire braid resulting in less stretching, twisting and kinking. Bend radius is smaller than most yarn braided competitors hoses. Seamless Polyester tube and Polyurethane smooth outer cover.

GERMAN ENGINEERED TECHNOLOGY

Mini-Jet Mini-Price

Visit
booth #4228
for show
special pricing.

For more info: www.drainbrain.com/JM1000

You don't always need a heavy duty jetter to clear a clogged drain. General's JM-1000 Mini-Jet™ brings surprising cleaning power to the job. And with its light weight, you'll be blasting away before you could get your big jetter off the truck and into position.

Clear small lines, clogged sinks, and laundry drains from 1-1/2" to 3" in diameter – with 1500 pounds of thrust. Pulse technology helps slide the hose around tight bends and farther down lines.

At only 23 lbs, General's tough Mini-Jet resists job-site abuse, too. The pump and motor assembly are safely contained in a rugged diamond plate metal case.

Pound for pound and dollar for dollar, the Mini-Jet is a great (and small) investment.

For more information, contact the Drain Brains® at General at 800-245-6200 or 412-771-6300, or visit www.drainbrain.com/JM1000.
