The latest technology.
The newest equipment.
The best ideas.

www.wwettshow.com
The WWETT Show - Water & Wastewater, Equipment, Treatment & Transport - will be taking over the Indiana Convention Center in Indianapolis February 20-23. On Wednesday, February 20, the day is dedicated to education, with sessions scheduled throughout the day. Then, starting Thursday February 21, attendees will get to walk the massive Expo Hall and Lucas Oil Stadium, seeing the best products and services available in the industry. You’ll be able to talk directly with the manufacturers, get hands-on via Exhibitor Demonstrations, and see the big gear in action at WWETT Live @ Lucas Oil Stadium.

Here is a preview of some of the products and services that will be on display.

APSCO
Booth #6824

ARC-30
APSCO, a manufacturer of pneumatic and hydraulic valves and controls for the mobile equipment & transportation industry is pleased to introduce our new 30gpm Hydraulic Reservoir, Filter and Cooling system – the ARC 30. Manufactured in the USA at our plant in Tulsa, Oklahoma; the ARC-30 is designed to cool and condition hydraulic oil on mobile equipment and transportation applications with hydraulic drives. “In developing the ARC-30 we listened to the voice of the customers to ensure that our design and our features were market driven,” said Chris Wunsch, VP of Sales & Marketing for APSCO.

A frame mount design, measuring less than 8” wide and rejecting 20hp of heat at 30gpm and 80o ETD (Entering Temperature Differential), the ARC-30 provides greater operating efficiency and longevity to the equipment’s hydraulic drive, while having the ability to be installed in tight spaces on either side of the vehicle. The ARC-30 is constructed from stainless steel and aluminum components, resulting in a corrosive resistant and visually attractive unit, suitable for the harshest of environments. Designed to be easy to service, all the components can be accessed and serviced by removing one panel. “Our engineering team’s thoughtful design includes an integrated manifold system that reduces the ARC-30’s tube and hose components to just one (1) low pressure hose. This provides the owner or operator greater durability, lower maintenance and easier serviceability over alternative products” said Vince Williams, APSCO’s CEO. “We are excited to introduce the ARC-30 to the industry. Manufacturing the ARC-30 at our plant in Tulsa allows us to produce and provide a quality product, and back it with APSCO’s high level of customer service and short lead times that we are known for.”

ROTARY LOBE PUMPS

Mobile Blueline Rotary Lobe Pumps from Boerger are self-priming, valveless, positive displacement pumps with flow capacities up to 5,000 gpm and reversible operation. These pump units are ready for rapid deployment of sewer bypass, municipal waste and stormwater, industrial effluent and sludge, digester and lagoon cleanup, flood disasters and spill emergencies (oil, gasoline, diesel, etc.). The rotor tip ensures cost-effective operation.

Suction and pressure hoses can be installed in minutes. The Blueline pumps are stable and wear-resistant. They are built with MIP (Maintenance In Place), allowing for quick access to the pump casing and all wetted parts through a quick-release cover.
BUCHER
Booth #6254

BUCHER RECYCLER®

With more than 100 years of experience, our products have played a central role in securing a sustainable environment and a profitable business for our customers through our environmentally friendly, innovative, and high-performance sewer cleaning units. We can take pride in designing and manufacturing the market’s best units using only the most technologically advanced components available.

One of our greatest innovations is the Bucher RECycler® units, which are operating all over the world in the most extreme conditions. The Bucher RECycler® units are indeed the most powerful and sustainable sewer cleaning units on the market. Available in two different tank sizes, 8 yd³ and 15 yd³, the Bucher RECycler® 208 and RECycler® 315 units are the most complete and versatile, enabling our customers to increase their productivity no matter the circumstances. The fully continuous water recycling system, automatic fuel-saving technology and an efficient and easy to maintain unit, has been produced and developed for over 30 years.

At WWETT Show 2019, visitors will be able to see these carefully designed and tested solutions as well as experience the benefits of our Bucher Center of Excellence, an international service hub for all our products. We are powered by innovation to make our sewer cleaning units and sweepers simply great machines.

Bucher Municipal North America is a leading manufacturer of sewer cleaning units. Globally, our product range consists of sweepers, sewer cleaning equipment, winter maintenance, and vehicles for refuse collection. Bucher Municipal is a part of Bucher Industries.
THOUSANDS OF DOLLARS IN CONTRACTOR SALES ARE LEFT ON THE TABLE DAILY FOR ONE REASON: LACK OF FOLLOW-UP. IN FACT, IMPROVING FOLLOW-UP HAS CONSISTENTLY BEEN REPORTED AS ONE OF THE MAJOR OBJECTIVES OF CONTRACTOR/SERVICE SALES TEAM LEADERS AND BUSINESS OWNERS. THAT’S BECAUSE EVEN A SMALL IMPROVEMENT IN FOLLOW-UP COMMUNICATION CAN YIELD A DRAMATIC UPTICK IN CLOSED BUSINESS.

NO WORLD-CLASS SALES PROCESS IS TRULY COMPLETE WITHOUT A CONSISTENT FOLLOW-UP SYSTEM. BUT IN THE PAST, IT HAS BEEN INCREDIBLY FRUSTRATING FOR COMPANIES TO STANDARDIZE AND GET CONSISTENT EMPLOYEE PARTICIPATION IN ANY PROCESS. THE REASON IS SIMPLE: FOLLOWING UP HAS ALWAYS BEEN A MANUAL, TIME-CONSUMING, AND PSYCHOLOGICALLY EASY-TO-AVOID STEP. THERE IS ALWAYS SOMETHING MORE IMPORTANT TO DO WHEN IT’S TIME TO CONTACT A LIST OF CUSTOMERS AND FOLLOW UP. WE EVEN RATIONALIZE THAT AS LONG AS WE DON’T HEAR A “NO”, THERE IS STILL A CHANCE. AS A RESULT, THERE ARE STACKS OF DEAD ESTIMATES WORTH THOUSANDS OR EVEN MILLIONS OF DOLLARS IN MOST COMPANIES. LET’S JUST SAY IT: TRADITIONAL FOLLOW-UP EFFORTS HAVE FAILED.

But there IS something that will work. In fact, Closing Commander™ makes following up effective, easy, and automatic! Now, every customer opportunity will receive friendly follow-up communications from you like clockwork, every time. Consistently close up to 20% more opportunities just by adding this simple follow-up automation to your existing sales process and letting it go to work for you. With Closing Commander™ (Booth #6849) you’ll be able to fully customize follow-up messages, track customer activity like email opens, clicks and replies, and see reporting on the success of your follow-up system. Finally, a solution to the frustration of lost opportunities and leaked revenue. Stop wondering if estimates will ever turn into jobs. Quit guessing if customers have moved on or not. Take command of closing more with Closing Commander™.
CUES
Booth #6030

CUES REDI KIT
The first CCTV pipeline inspection troubleshooting kit available on the market today! CUES has developed a new pipeline inspection tool designed to significantly reduce unplanned downtime. The CUES REDI (Remote Evaluation Diagnostic Inspection) Kit is the first pipeline inspection troubleshooting kit available on the market today designed to help diagnose electrical issues, allowing for quicker and more accurate troubleshooting and repairs of problems while in the field. The release of this new product reflects CUES continuing commitment to offer the best customer support services in the business.

The CUES REDI Kit features a hi-resolution web camera for two-way video conferencing with CUES to expedite troubleshooting and enhance parts identification, a diagnostic test box for easy access to the TV cable conductors via test points, a built in mini-camera, used to send video back thru the TV cable and truck, and much more. Use the REDI kit, along with the CUES technical staff, to take CCTV pipeline inspection troubleshooting and support to the next level.

This handy diagnostic kit includes tools that are indispensable at remote sites for electrical issues, troubleshooting, and repair. Get up and running quickly and GO THE DISTANCE with the CUES REDI Kit!
FORMADRAIN
Booth #1461

FORMADRAIN®
FORMADRAIN® is a steam cured pulled-in-place lining system used for lining laterals, spot repairs, industrial process pipes and LMC Lateral-Main-Connections®. Pipe diameters range from 2 to 48 inches and can line elbows and transitions through an existing cleanout for a completely “no-dig” repair with perfect results every time.

The strength of our liners, the reliability of our system and the quality of our technical support are unmatched in the industry. The system comes with all you need to line and on-site training by experienced engineers.

DURAPOX LINERS®
Formadrain®’s DURAPOX liners are built with the same high quality materials as our standard liners but benefit of the magic of a 60-day open-time steam cured resin.

That much work time means no liners lost over time restraints or unforeseen difficulties, no unneeded rushes that can cost big. Your crew can focus on their work without stress. Tired of preparing liners or lacking the space to build them? We’ll ship them pre-wet to your specifications, ready to insert and cure.

Call now at 888.337.6764 or visit www.formadrain.com for your FREE Info Pack, also available at Booth #1461.
GENERAL PIPE CLEANERS
Booth #4328

JM-1000 MINI-JET™

General Pipe Cleaners Introduces New Inspection Systems at WWETT19 Show – Indianapolis Win a free JM-1000 Mini-Jet.

Plumbing and drain cleaning professionals can catch the latest from General Pipe Cleaners at the WWETT19 Show, Booth #4328. Stop by and register to win a free JM-1000 Mini-Jet.

The compact, lightweight JM-1000 Mini-Jet™ quickly clears grease, sand and ice clogs – at a great price! Unclog sinks, laundry drains and small lines from 1-1/2” to 3” with 1500 psi of cleaning power. Pump & motor for the portable, 23-lb JM-1000 come securely contained in a rugged metal diamond plate case – no bigger than a tool box.

General Pipe Cleaners will showcase newest additions to its popular Gen-Eye® line:

- Gen-Eye X-POD®
- Gen-Eye Micro-Scope2®
- Gen-Eye USB®

Just grab one – and go! New, “all-in-one” Gen-Eye® systems combine camera, reel, and monitor into one compact, convenient package.

Check out added features like the ability to record inspections on flash drives, one-touch recording, 4X digital zoom, voice-over recording, flash drive capacity indicator and more!

Can’t make the show? General’s mobile-friendly www.drainbrain.com website offers quick, easy, intuitive access to its full line of drain cleaning, water jetting and inspection systems.

Or call the Drain Brains® at General Pipe Cleaners at 800-245-6200 for more information.

General Pipe Cleaners, a division of General Wire Spring Co., is a leading manufacturer of high quality American-made drain cleaning equipment. In business since 1930, the third-generation family-owned company is celebrating nearly 90 years of service to drain cleaning professionals and plumbing contractors, as well as facilities managers, the rental industry and the hardware/DOY market. The Toughest Tools Down The Line.
HI-VAC CORPORATION

- Right-sized for your application, the X-Vac X-13 provides the largest legal payload of any full-sized hydro excavator
- 13 cubic yard debris tank is ideal for applications when dumping on site is required
- Up to 24,500 lbs. of legal payload capacity
- 5,800 CFM 27” Hg high-performance blower
- Top-mounted 360-degree boom provides maximum coverage
- Insulated heated enclosure for both the water and vacuum systems
- Run dry water pump: 20 GPM at 2,500 psi
NOZZTEQ
Booth #2307

PAIKERT INTRUDER IMPACT CUTTER

The Paikert™/Intruder is a low-speed, high-torque cutter designed to clear tough, stubborn pipe blockages like hardened concrete, tuberculation, and thick, woody roots. Paikert™/Intruder cutting nozzles have proved themselves around the world, and used commercially for more than 30 years.

The Paikert Intruder operates in three distinct modes for different cutting needs:

- **Impact & Drill**, the most effective mode for hard deposits like concrete and tuberculation. Material is pulverized by the cutting head and flushed away.
- **Drill only**, a good choice for protruding laterals, and other situations where clean, precise cuts are needed.
- **Impact Only**, excellent for pushing objects down pipe without damage, as when plugs or other equipment are stuck.

Typically operates at 1,000 blows per minute and 200 rpm. Completely water driven and patented “Hydro-Torque” motor cannot come to a standstill or seize during use. Numerous accessories and configurations available to customize the Intruder for your specific cutting needs.

NozzTeq Inc. Rents this cutter on daily, weekly and monthly basis for sizes 4-24”. We also have custom Sizes of 27, 30 & 36” that require larger unit to operate.

RIDGID
Booth #1245

RIDGID K-1500 SECTIONAL MACHINE
Release Highlights:

• The most powerful compact sectional machine ever with a 0.75 HP motor and cable that can spin up to 700 RPM, it is also 30 percent lighter than the RIDGID K-1500 Sectional Machine.

• Tool-less clutch adjustment lets you quickly switch cable sizes, and infield clutch serviceability allows you to make necessary repairs on-the-job.

• Enhanced cleanliness with fluid reservoir for later draining and enclosed cable feeder and carrier.

RIDGID® Introduces Most Powerful, Compact Sectional Machine on the Market
ELYRIA, OHIO - September 25, 2018 - Plumbers who know their trade understand that there is always a trade-off between sectional machine models. Now they don’t have to sacrifice power for portability with the new RIDGID® K-5208 Sectional Machine. It’s the most powerful, most compact, easiest-to-service and cleanest drain cleaner on the market.

Weighing 30 percent less than the RIDGID K-1500 Sectional Machine, the K-5208 is purpose-built to cut through the toughest roots with a HP motor and cable that can spin up to 700 RPM. Designed for drains 2” to 8” in diameter, it features a tool-less clutch adjustment to quickly switch between 7/8” to 1” cable sizes. It comes with a new Trident Sectional Cable Decoupler for disconnecting cables efficiently and cable feeder with guide tube for easy loading and unloading into an enclosed cable carrier. Infield clutch serviceability minimizes downtime, while a carrying handle allows for easy transport from truck to jobsite.

Designed with high-strength square steel tubing and rubber feet for enhanced stability, the K-5208 includes an innovative fluid management system that incorporates a reservoir to catch fluid for later draining. The enclosed cable carrier and cable feeder also enhance cleanliness by reducing exposure of the cables on the jobsite.

“The RIDGID K-5208 Sectional Machine has been thoughtfully designed from top-to-bottom based on feedback from professional plumbers who demanded a more powerful and portable option,” said Wyatt Kilmartin, vice president and general manager, global underground technologies, RIDGID. “This new machine is lighter and cleaner with go-everywhere power.”

The K-5208 and other RIDGID drain cleaners are built at the RIDGID plant in Orange, Virginia and include the RIDGID Lifetime Warranty.

To purchase or learn more about the K-5208 contact your local distributor, visit RIDGID.com/K5208, or call toll-free: 1-800-769-7743.
Known for its superior Summit Rental System™ for the portable restroom industry, Ritam Technologies has Summit for septic, grease, drain, and plumbing services. Super-charge your QuickBooks with powerful industry-specific capabilities.

**Core Features:** An extremely simple to use customer, job site, and work order setup leads to efficient appointment calendars to drag/drop technician assignments and scheduled time/duration changes. Powerful maps of pending jobs provide easier management of workloads and productivity. Summit offers detailed work orders, diagrams, tank info, condition comments, and much more. Capture repeat business with reminders (email, text, cards), and automatically schedule repeat services based upon their selected service frequency. Lite editions are available. Pro edition includes full customer accounting, secure credit card processing, invoices, statements, and auto-pay receipt emailing. Sales and accounting reports round out the system. New Deluxe and Premium editions (available June, 2019) add many more features.

**Mobile - Android/iOS:** Take your services with you! Using smart phone, tablet, iPhone, or iPad, obtain detailed route schedule maps, voice navigation, access work order info, including special instructions. Send instant customer notices (email or text) for schedule changes and proof of service. Supervisors view map of all jobs with current status and technician location. For designated users, electronic job completion and payment receipt eliminate your after-hours paperwork. Choose Limited Access or Expanded Access according to the trust you place in technicians.

**Online Customer web portal:** Allow customers to securely make account changes, payments, and service requests 24/7. Get paid and collect orders while you sleep!

**Corporate reporting module** is an option for multi-company, multi-branch consolidated reports providing powerful oversight and planning. An ad-hoc report writer is built-in!

- Simple • Efficient • Powerful • Mobile • Online • • • Since 1981

Extremely affordable, whether small, mid-sized, or mega company.

Find Summit Proof! and Summit Proof! Mobility on Google Play and Apple App Store!

**SALCOR 3G UNIT**

**SALCOR’s 3G Unit Wins the Battle!**

One of today’s greatest battles is how to create and maintain clean, safe and re-usable water, in every community, worldwide! Two of the most serious enemies we face are Superbugs and harmful chemicals.

**VICTORY!**

SALCOR’s 3G Unit is a unique proprietary UV process that disinfects wastewater by rendering harmful bugs inactive, without adding harmful chemicals. Life-threatening viruses & bacteria/Superbugs are unable to reproduce, helping to stop the spread of fatal epidemics. We All Win, they Lose! Defeat Superbugs!

**BEST FOR THE ENVIRONMENT**

- No Harmful Chemicals added
- Enables Wastewater Recovery & Reuse
- Survives Weather Disasters – hurricanes, floods & electrical storms
- UL Listed Floodproof NEMA 6P, survives 30 days under water
- Most 3rd Party Tested, NSF / WA State protocol with 21 ATU’s

**OVER 40 YEARS OF INNOVATION**

SALCOR pioneered UV Disinfection by creating the 3G Unit that is scalable, providing protection for residential, commercial, and even municipal systems from 9,000 to 100,000+ GPD.

- Originator of a Revolutionary Foul-Resistant Teflon® Lamp Barrier
- Low Cost <40 watts, with Easy Install, and O&M
- Reliable LED Visual Monitoring & Alarm Contacts
- 2-year Warranty on Unit and “Long Life” Lamp
- Family Owned since 1978
- Made in USA
- Worldwide Ultraviolet Disinfection Leader

SCREENCO SYSTEMS
Booth #6314 & 6318

MEGA SCREEN 800
SEPTIC RECEIVING STATION

The Mega Screen 800 Septic Receiving Station from ScreenCo Systems, LLC., features the patented Dual Screen Design.

Screen includes all the same great features as the rest of the screening systems line. Includes 51 square feet of screening area, fed by a 6” or 8” inlet with dual fan spreaders deflecting waste down onto the screen making front screen virtually self-cleaning. Complete Industrial Vac Tank cleanout is capable with the optional side and front splash sheeting. This allows for Vac Truck to simple back over the front of the unit and raise rear tank-opening and hoist for full tank clean out. Processes up to 1,000 GPM of wet well or septic waste, with 8” cam outlet fitting. This Screen is second to none in the industry for its volume and ease of trash removal. The patented Dual Screen Design is unique and totally non-mechanical and uses gravity to separate trash from the waste stream.

The standard unit features all aluminum construction with stainless-steel 3/8” gapped bar screens on the opposing angles and meet the Ecology 503 Regulations for septic screening. The Screen can be set up with a single 6” or 8” inlet hose or two 4” inlet hoses capable of offloading two trucks simultaneously. The Screen will not plug with rags or trash. Simple raking to the trash drain tray with the custom stainless-steel cleaning tools provided make for a simple cleanout through the 7’ universal folding trash chute. Bolt on chute assembly allows for trash exit in either direction. Built in forklift skids make the unit portable allowing for setup virtually anywhere. OSHA compliant aluminum catwalk included. Mega Screen 800 also available in all stainless-steel construction.

SUPERIOR 5E ELECTRIC SMOKER
Find Plumbing Leaks and Sources of Odor with the Superior® 5E Electric Smoker

The Superior® 5E Electric Smoker offers a cost-effective solution to find difficult leaks and odors in residential and commercial plumbing systems. Connect blower to any plumbing cleanout or vent, and use appropriate size smoke candle to force smoke through faults and cracks, easily identifying sources of odor and hard to find leaks. Smoke tests take just minutes to perform, and see immediate results with this simple and convenient solution.

Use with a 1A or 2B Superior® Smoke Candles which create 4,000 or 8,000 Cubic Feet of smoke respectively. Superior® Smoke candles are also sold in convenient SealPac® cans which extend shelf life.

Find Sources of Odor - anywhere a Smell can go the Smoke will go too. Find sources and causes of Odors in just minutes that might otherwise take days to find. Smoke Testing is an effective technique to find odors and many other faults throughout the building plumbing, the septic system, and even the leach field.

Find Plumbing Faults & Test New Plumbing - quickly find cracked or broken pipes, nail or screw damage, bad connections, improper venting, open pipes or fittings, dry traps, and improper hookups. Smoke Testing can often be used as a Primary Test for new plumbing, or as a secondary test to locate leaks and problems quickly and easily after a failed water or pressure test.

Made in the USA, the Superior® 5E Electric Smoker comes complete with 8’ industrial grade flex-hose, weighs just 8 pounds, and requires no maintenance. Used with economical Superior Smoke Candles, this cost-effective solution for hard to find odors, leaks and other faults in residential and commercial facilities has no equal.

BATTIONI PUMPS

INNOVATIVE QUALITY—ENGINEERED TO PERFECTION!

And NOW all of that in a Build it yourself package.

Battioni Pumps (yes we know its hard to pronounce- say BA=TEE-=ONI) have been providing quality Vacuum Pumps since 1956. Produced in Italy and brought to the USA by Varco, Battioni and Varco have joined forces to design innovative packages that work for YOU. Plenty of Options, Plenty of Power AND easy to install- just bolt and go!!

From our Vane Cooled MEC13500 package, engineered to provide you 489 CFM in a 3” pump, to our new Liquid and Fan cooled pumps and packages, we provide you with a custom easy to bolt up package, built the way you want it.

Want a Pump on stand? No problem!

Want to add a Muffler? No problem!

Want a Muffler and a Secondary along with the final filter? No Problem!

Our new Fan cooled pump packages come with 2 fans to keep them cool PLUS 3 ballast port filters mounted low to suck cooler air. Built in Final Filters are included at no extra charge, along with our exclusive CRASH PROTECTION to protect your rotor from those accidents that happen.

Our new Liquid cooled pump packages come with a liquid cooling jacket, PLUS ballast port filters mounted low to suck cooler air. Built in Final Filters come standard, AND A BUILT IN RECIRCULATING PUMP to make sure the pump is effectively cooled. CRASH PROTECTION also comes standard.

Prices start as low as $2200!! We don’t worry about colors or what can swap out with what- instead find the most POWERFUL pumps at the LOWEST PRICE in an EASY TO MOUNT package!

Come check them out at booth 5162 & 5158.

INSPECTION CAMERA SYSTEMS
The vCamMX-2 Mini System is a portable all-in-one camera to inspect pipes from 1 to 4 inches. The system includes USB recording, internal microphone, 512Hz sonde, 1” high resolution self-leveling camera and is available in 100 or 150-foot lengths.

The vCam-6 HD Inspection System gives municipalities and plumbing contractors a fully equipped system for inspection lines from 3 to 10- inches. Features such as text writer, voice over, locatable sonde, and traceable pushrod are included as standard equipment. The standard reel is available with 200, 300 or 400 feet of pushrod and choices of 1.3” or 1.8” self-leveling HD camera.

SONDE AND UTILITY LOCATORS
The vLoc3-Cam Sonde and Camera locator is a quick and accurate way to locate camera sondes. The intuitive color graphical display directs the user to the sonde with 360-degree directional arrows with no worry about ghost signals. The vLoc3-Cam is compatible with the major push and crawler cameras on the market. The locator includes a Pushrod Trace mode and Passive mode for locating buried energized cables. It can also locate buried utilities with an optional transmitter.
